Patent Metal Fret-Cutting Tables.

These Tables, made to supersede the wooden ones, are of softer metal than the Saws, and consequently do not injure them; although when the Saw touches the Table the worker is immediately aware of the fact.

No. 1138W
- Of Pressed Steel, nickel-plated and polished, and fitted with a strong Iron Cramp. This is the Cheapest and most Serviceable Cutting Table in the market, and superior in every way to the Wood Cutting Boards. Strongly recommended to those who are taking up fretwork for the first time.
- Price: £/ each

No. 1139W
- The Table and Cramp being made separately, are more portable, less liable to breakage, and take up less room when not in use. They can, however, be instantly locked together by means of a simple but ingenious Socket. When fitted to a bench or a table they are absolutely rigid.
- Dull Nickelled: £1/- each.
- Nickelled and Polished: £1/6 each.
"New Rogers" Fret Machine.
No. 1140W.

The latest improvements on this Saw are a new Blower and a new Clamp for holding the Saw Blades.
The Arbors, etc., are made of Steel, and are carefully gauged and fitted to their bearings.
The Bearings to the Arms are carefully sized to bring them in perfect line. (This is a vital point in the construction of any Jig Saw.)
We provide each Machine with a Dust Blower, which is a very great advantage.
Our Machine has a JOINTED Stretcher Rod, which allows the operator to throw the upper arm out of the way when adjusting his work or saw. This joint also permits the Machine to work much more freely than with a straight iron rod.
Our Clamps have a Hinged Jaw, which overcomes the disagreeable raking overthrow of the blade, which is unavoidable when the saws are secured rigidly to the arms.
The Balance Wheel is 4½ in. in diameter, with a handsome Spoke Centre, and a Rim of Solid Emery.
Our attachment for Drilling is on the right-hand side of the Machine.
Each Machine is set up and run and carefully inspected before leaving the works. It is then taken down and boxed.
With each Machine we give 12 Saw Blades, Wrench, Sheet of Designs, and 3 Drill Points. Weighs 25 lb.

Price complete, with Case ... ... ... 17/- each.
With Balance Wheel of Iron, instead of Emery, and with Japanned Table, instead of Nickel-plated, and fitted with Blower.

Price complete ... ... ... 14/6 each.

"The Star" Scroll Saw.
No. 1141W.

Our attention having been called to the demand for a machine of a little higher grade than the "Rogers" Saw, we now offer the "Star" to meet this want. The peculiar advantages of the "Star" over the "Rogers" may be summed up as follows:
1. In method of hanging the Arms, giving them free and easy movement.
2. In adjustment of Arms so that they may be kept parallel with each other.
3. Heavier Drive Wheel for heavier work.
4. Two Balance Wheels, one each Iron and Emery, the extra weight of additional Wheel giving steadiness to the motion.
5. A Chuck for holding Drill Points.
6. The Emery Wheel is fastened by adjustable Clamps which can also be used for holding various other sizes of Emery Wheels, Grindstones, Buffing Wheels, etc.

To adjust the Arms, all that is necessary is to loosen the Bolt which goes through the Upper Arm in front of casting, and crowd the Arm sideways either to right or left and into line with the lower one; the hole in casting is elongated to permit of change in position as described. The Table is nickelled, and the general finish of the Saw same as other machines made by ourselves. It weighs, net, 37 lb., and boxed 55 lb.

Price ... ... ... ... ... 21/- each.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
Hand Fret Machine.
No. 142W.
This Machine will take work up to 18 in. in length.
Price, packed in box ... 10/- each.
Extra Patent Saw Clamps for the above, Hardened Steel Thumb screws and Shackles for ditto, 1/6.
We stock and supply all the parts and fittings for the above machines.
A Balance Wheel, Price 1/8, may be added to give greater freedom in running.

Treadle Fretsaw.
No. 1143W.
A cheap and reliable pattern, with Enamelled Iron Frame, Patent Spring Clamps which will hold the finest saw, and Varnished Beech Arms which will take work 18 in. long and up to 1½ in. thick.
Price, including Wrench, one dozen Saws, and Design ... 12/6
Extra Saw Clamps ... 1/6

Treadle Fretsaw.
No. 1144W.
With Drilling Attachment. A strong well-fitted machine of graceful design and accurate in working. The Arms, which are kept in position by trusses, have a Swing of 19 inches between Saw and Frame. They work on knife edges, and are fitted with connecting links which prevent them from flying off. There is a superior Tilting Table 1½ in. diameter, also a useful Metal Tray. The Saw has a practically vertical stroke, cutting rapidly and accurately, and there is more room between the top clamp and the table than is the case with most machines.
Price, with Drilling Attachment as shown, and complete with Oil Can, Spanner, Screwdriver, 6 Drill Points, 1 dozen Saws, and 6 Designs ... £2: 2: 0
If without Drilling Attachment ... ... ... 1: 15: 0
Extra Patent Saw Clamps, plated, 2: 6 per pair.
Carriage Forward.

A large and varied Stock of Engineers' Tools and Motor Accessories.
Lathes and Fret Saw Attachments.

No. 1145W.

This Lathe is large enough to do small useful work, and is supplied with all the tools and instructions needed for putting it into successful use.

The Lathe Bed is 24 in. long, 12½ in. between Centres, and 5 in. Swing. The Scroll Saw can be taken off by loosening one bolt. The quality and price of this Machine will ensure it a very large sale.

Price of Lathe and Tools with Scroll Saw Attachment ... £2:0:0

" Attachment only ... 0:7:6

" Circular Saw Attachment ... 0:4:6

We warrant all goods bearing our name to be perfect, so far as material and workmanship are concerned. If a tool proves too soft, or breaks in consequence of a flaw in the steel, and is returned within a reasonable time from the date of purchase, a new tool will be given in exchange. If it is broken where the steel is sound it cannot be exchanged.—Rd. MELHUISH, Ltd.

No. 1146W.

This Lathe is patterned almost exactly after the latest improved lathes now used in the best machine shops. The large Driving Wheel has two grooves, of varying depths, on its face. The Lathe Head is provided with a 3 in. face plate, a spur centre, a screw centre for turning cups, and also with a very nice drill chuck to hold 5/8 in. round twist drills for drilling wood or iron. It has also on the outer side of the pulley a solid Emery Wheel and Drill Spindle, with set screw to hold drill points. The Tailstock has a screw-feed centre, which is secured at any point desired by a clamping arrangement. It is also provided with a long and short Tool Rest, 5 Turning Tools, Wrench, Drill Points, etc., etc. Swing of Lathe, 5 in. Length of Bed, 24 in. Distance between Centres, 13½ in.

The Scroll Saw Attachment (as seen in the cut) is secured to the Lathe Bed by one bolt, and can be put on or off at pleasure. This attachment has all the improvements.

The Circular Saw Attachment consists of a Saw Table 7 x 6 in., a Saw 3 in. diameter, and a Saw Arbor. The Lathe Rest Socket is used to support the table.

This Lathe is thoroughly built and highly finished, the planed and polished parts being nickel-plated.

Weight, 78 lb.

Price of Lathe and Tools with Scroll Saw Attachment, complete in Case ... £2:10:0

Price 1/6 each.

Combination India Oilstones.
These Stones have one face medium and one face coarse grade. The coarse side can be used for sharpening dull tools, or tools where fast work is required without regard to fine finish, while the medium size can be used when a finer edge is required, or for finishing after the coarse side has been used.

Sizes: 6 x 1 1/4 x 1/4, 6 x 2 x 1, 7 x 2 x 1, 8 x 1 1/2 x 1 1/2, 8 x 2 x 1 in.
Price: 2/-, 2/8, 3/6, 4/6, 4/6, 6/6 each.

India Oilstone Wheels.
These are of the same texture and material as the regular India Oilstone. They are made in the same variety of grades, and are used for the same purposes as the wheels made from natural stones, such as Washita and Arkansas.

A large and varied Stock of Engineers' Tools and Motor Accessories.
India Oilstones.

These are a composition Stone, very strong and durable, of particular evenness and clearness of grain throughout, and with remarkable cutting qualities. The Fine Stones leave a keen, smooth edge on the hardest and finest of steel tools, giving results equal to those obtained on the usual Arkansas hone, and are adapted for sharpening high-class wood and metal workers' tools. The Medium Stones are for ordinary carpenters' tools, also for machine and hand knives, for paper, cloth, leather, rubber, etc., and will make a quick cutting edge.

India Oilstones (unmounted). Prices of Stones only. Fine and Medium, same Prices.

Contractors to the Home, Indian, and Colonial Governments.
Carborundum Stones.

No. 1228w.
Pocket Stones.

A very useful Stone for sharpening the penknife or ink scratcher. Furnished in a neat leather case, convenient size for pocket.

No. 145. 4 x 1 in. (fine) complete in Case... 1/9

No. 146. 4 x 1/8 in. (medium)...

No. 1230w.
Combination Stones.

Made in five sizes.

No. 1232w.
Carborundum Grains and Powders.

The Carborundum Grains and Powders are produced by crushing the crude Carborundum crystals. The grains are subjected to an acid treatment, then graded into the different grits by a sieving process. The grains too small to grade by sieving are graduated in running water, the finest grains being those which float longest.

Grains No. 60, 70, 80, 100, 120, 150, 180, 220.
Powders FF, F, FF.

Price in 1 lb. tons, 13 per ton. Either Powders or Grains.

No. 1235w.

No. 1234w.
Carborundum Niagara Scythe Stones.

A strong, durable and wonderfully rapid cutting Stone. They do away with the grinding of a scythe altogether, by producing a keen, sharp edge and doing it faster and easier than it could be done on the best grindstone ever made.

No. 190. 10 in. long. Price 1/9 each.

No. 1238w.
Pocket Stone.

This little Stone is made of fine Carborundum Powder, and of a hardness suitable for sharpening pocket knives, ink scratchers, scissors and small tools. It is a smooth, fast cutting stone, producing a very sharp, keen edge.

No. 149. 3 x 1/2 x 1/2 in. fine. 9/9 each.

No. 1239w.
Knife Sharpener.

A solid shaft of Carborundum, firmly mounted on handle by a steel rod extending its entire length, giving it strength and durability.

Length over all, 12 in., per Sharpen... 1/9-

Bronze Medal, 1884.—Gold Medal, 1890.
Carborundum Wheels, Stones, Powders, etc.

Carborundum is a manufactured abrasive. It is a chemical combination of carbon and silicon, and is much harder than other abrasives. Very fast cutting, and can be used either wet or dry.

For Lists of Emery Wheels and Grinders, see our Engineers' and Metal Workers' Catalogue.

No. 1243W. Aluminum Oil-stone Boxes.

These boxes are made of highly polished aluminium and are furnished in three sizes:

For No. 1 box—No. 105 Combination stone, 5x2x1 in. $3/3.
1 = 115 Fine stone, 5x2x1 in. 1/3.
2 = 116 Medium stone, 5x2x1 in. 3/3.
2 = 109 Combination stone, 5x2x1 in. 4/3.
2 = 121 Fine stone, 6x2x1 in. 3/3.
2 = 122 Medium stone, 6x2x1 in. 2/3.
3 = 139 Fine stone, 4x1 1/2 in. 2/3.
3 = 140 Medium stone, 4x1 1/2 in. 1/9.

We recommend the use of the following stones in these boxes:

No. 1245W. Machinists' Special.

This stone is especially designed for the Machinist's use, fast cutting, and holds its shape perfectly. The grit and grade of hardness is adapted to sharpening lathe and planer tools, milling cutters, reamers, and grills.

No. 292, 4x1 1/2 in., FF (fine). Price, 1/8.

No. 1244W. Points.

98, 180 (medium) ... 2/3.
99, 120 (coarse) ... 2/3.

No. 1247W. Instrument Hone.

Made of the very finest hand-washed powder. Unexcelled for producing a keen edge. A very useful hone for surgeons and dentists. Furnished in a neat black leather case, convenient size for instrument case.

For No. 100, 4x1 1/2 in. ... Price, 3/3.

Tool, Machine, and Hardware Merchants and Manufacturers.
The Handy Grindstone.
No. 1248w.
The Family Grindstones, illustrated in former catalogues, have had a large sale, but this is much better than either of them. It is a Huron stone, 1½ by 14 in. Being three times as large, the surface runs three times as fast as the old kind. There is nothing about the machine which will break or get out of repair. Japanned iron frame. Weight, packed, 85 lb. Price 19/- each. Carriage Forward.

Bench Grindstones.
No. 1249w.
Best quality, fast-cutting Blue Grit Stones, fitted in iron frame with wrought iron spindles, having screwed nut and collar plates to prevent the possibility of the stone breaking.

Pulleys for same 10 in., 5/6; 14 in., 6/6 each.

Sizes and Prices.

A large and varied Stock of Engineers’ Tools and Motor Accessories.
Grindstone Dresser. For Face and Sides.

No. 1256W.

Fig. 1.

Position of Cutter when Truening Edges.

Will true a grindstone on face and edges in a few minutes whilst running at its ordinary speed. The Cutter is made of thin sheet steel stamped in the form of a cone. It cannot wear blunt, lasts a long time, and when worn out can be replaced at a small cost.

It can readily be fixed to troughs of varying widths by shifting the brackets BB; the tubular slide A can be swivelled so as to bring the cutter axis into correct position relatively to the centre of the stone.

In the new Double-Action Grindstone Dresser the cutter bush holder F can be fixed in the cutter bar in two positions—the one for trueing the Face (Fig. 1), and the other for trueing the Edges.

Safety Tool Rest for Grindstones.

No. 1258W.

This Tool Rest is perfectly rigid and steady when in position. Consequently accidents to workmen through the Tool jamming between the Rest and Stone are entirely prevented.

Illustration shows Rest set for use on a new stone.

When ordering give distance between centres of Bolt Holes.

For Troughs up to 12 in. between Centres ... 12/6 each.

20 ... 14/6

Contractors to the Home, Indian, and Colonial Governments.
Chisel and Plane-Iron Holder.

No. 1259w.

With this appliance Plane Irons, Paring Chisels, Turning Gouges, and Metal Scrapers may be ground rapidly and accurately, and with comfort and cleanliness. Inequalities on the face of the stone scarcely affect the result, and good work may be done, even with the grindstone in bad condition.

The Attachment may be fixed to the trough of an ordinary grindstone; the illustration shows it in use, and the dotted lines show its position when out of action, and whilst the cutter is being clamped.

The Clamp which holds the Cutter to be ground may be tilted to the required angle, and adjusted to suit the decreasing diameter of the Grindstone.

The Levers or Arms which carry the Clamp or Cutter holder are attached to the column by a universal joint, which allows Turning Gouges, etc., to be ground as readily as Plane Irons and Paring Chisels.

Any desired pressure may be applied at the handles, but for light work the weight of the Levers is sufficient. The base of the column has holes for bolting to the flanges of Grindstone Trough, but any special fixing that may be necessary can be supplied on receipt of particulars and dimensioned sketch.

Price of Grinding Attachment only, suitable for stones up to 36 in. diameter, £1:7:6.

(Carriage Forward.)

Patent Tool Grinding Appliance.
Adopted by the London County Council in Manual Training Centres.

Export orders have the attention of experienced men. Our knowledge of the various markets enables us efficiently to execute Foreign Commissions, respecting which we shall be pleased to communicate with our clients abroad.

R. MELHUISH, LTD.

By using the above Apparatus the following advantages are obtained:
Perfect accuracy in Grinding Tools.
The surface of the Stone is worn evenly; no turning-up required.
The Tools can be examined at any time during grinding operations without being taken out.

By the simple adjustment of the thumbscrews at the back, the Appliance can be set to grind any angle.
No previous knowledge of grinding required.
Tools ground in half the time usually taken, and with better finish.
When not in use can be turned round, right away from stone.

Can be fitted to any Grindstone from 18 x 2 in. up to 24 x 4 in.

Price .... .... .... 25/- each.

Bronze Medal, 1884.—Gold Medal, 1890.
Patent Tool Sharpener (Melhuish’s).

No. 1261w.

Adjustable to any Bevel. A Perfect Edge with minimum of grinding.

We claim for this method that it will better preserve the bevel of Plane Irons, etc., and enable the workman to sharpen his tools more effectively and quickly than by the regular method. To the frame which carries the stone is attached a leather strap having a stirrup for the foot. This overhangs the edge of the bench, and may be adjusted by means of a slip buckle. The stone is then drawn under the tool by pressure of the foot in the strap, and returns by tension of a spiral spring. A perfectly uniform bevel and keen edge can be put on the tool in this way. A very large number of these are now in use with the most successful results.

Price of Sharpener, 11/6 each.

Oilstone, 2/- extra.

Tool Grinding Rest.

No. 1262w.

This Rest consists of a frame through which the Plane Iron or other tool to be ground is passed, being held in position by a clamp screw, which works through the upper part of the frame.

A small wheel, placed underneath the frame, travels on the surface of the stone, enabling the user to hold steadily in one position.

Any desired angle can be given by adjusting the position of the tool in the frame.

Price 1/3 each.

Chisel and Plane Iron Sharpening Machine.

No. 1263w.

This useful machine is simple in use. A boy can sharpen a Plane Iron, and ensure having a straight and true edge, in less time than the most experienced workman could with a stone.

Price 5/9 each.

Chisel and Plane Iron Grinder.

No. 1264w.

This is an invention for holding Chisels, Plane Irons, etc., while sharpening them either on the oilstone or grindstone. When put in the holder and brought to the right bevel with the adjusting screw, nothing is left to do but to bear it on the stone, and it will grind right away without further care.

Price 3/3 each.

IMPORTANT TO THOSE ORDERING THROUGH SHIPPERS.

In order to ensure entire satisfaction, we advise our friends to be careful in giving definite instructions that the goods shall be procured direct from our house. By these means they may be sure of receiving the pattern and quality specified in our Catalogues.

RICHARD MELHUISH, Ltd., London, E.C.

Tool, Machine, and Hardware Merchants and Manufacturers.
Technical Instruction.

Having a considerable experience in fitting out Technical Classes throughout this country and abroad, we beg to call attention with regard to this to all who are interested in Technical Instruction. We are able to supply Practical Workman's Tools of our best quality and design at the most favourable rates, and shall be pleased to forward particulars and prices on receipt of inquiries from those who are conducting Technical Classes.

For the guidance of those who are beginning, we give hereewith a list of tools required for a class of twelve boys; this represents a fairly complete outfit, and could be reduced in number where a limited sum is being devoted.

Complete with Tools: £172.6
Empty: £45.6

Contractor to the Home, Indian, and Colonial Governments.
Cabinet Maker's Bench.
(For Light Work.)

With Front Vice, Wooden Bench Screws and Guides, and two Bench Stops.

Although low in price, this Bench is strong and durable, and can be supplied with or without drawer between frame.

The top is made from several pieces exactly and carefully jointed, and can neither warp nor twist. The guide rails are made from very dry, hard wood, and the Bench Screws, which are soaked in hot oil before being fitted, are proof against the influence of air and weather.

Length over Top, not including vice jaw, 55 in. Width over all, 22 in.

Price .... ... ... £2 : 14 : 6

Work Benches, made from Solid Beechwood.

Of heavy and substantial manufacture, and fitted with Front and End Vices with hardwood screws; also with a pair of Iron Bench Stops. There is a well in the top, also a commodious Drawer underneath.

Length 4 ft. ... ... Price 42/-
" 5 ft. ... ... " 50/-
" 6 ft. ... ... " 65/-
" 7 ft. ... ... " 75/-

We can fit any Instantaneous Grip Vice to the 5, 6, and 7 ft. sizes of this Bench.

Prices and particulars of Technical Benches up to 12 ft. long sent on application.

Melhuish's New Pattern Work Bench.

With Drawers and Cupboard, also Instantaneous Vice and Adjustable Stops for holding work.

The top is made from well-seasoned Beech, and the front is of Stained Mahogany and polished.

The Cupboard is fitted with a 2-keyed Lever Lock.

3 ft. long, 20 in. wide, 36 in. high, £6 : 18 : 0
6 ft. long, 20 in. wide, 36 in. high, £7 : 10 : 0

N.B.—We can fit Lever Locks with Keys to the Five Drawers, at an extra charge of 11/–.

Al. Benches Carriage Forward.

Bronze Medal, 1884.—Gold Medal, 1890.
With Adjustable Metal Stops for holding and clamping work; also fitted with 2 Best Quality Bright Wrought Square-Thread Bench Screws, and Sliding Rail.
5 ft. long x 1 ft. 11 in. x 2 ft. 9 in. high,
£2 : 10 : 0 each.
6 ft. long x 1 ft. 11 in. x 2 ft. 9 in. high,
£3 each.
If with large Bench Vice with Steel Jaws, 15/ extra.

This useful Vice can be fixed and taken away instantly, leaving only the small flat plate sunk flush with the bench. (See right hand of illustration.) Indispensable for those working in sheet-metal, etc.

This Bench takes to pieces, and can be stored away when not required, thus occupying very little room.

Boy's Work Bench, with Twin Screw Bench Vice and Hardwood Bench Stop.

Well and substantially made from Solid Beechwood.
Dimensions of Top, 54 in. long x 15 in. wide x 1 1/4 in. thick.
Height 31 in.
Price .... ... ... 25/ each.

Other sizes of this pattern made to order. Quotations will be sent on receipt of sketch or specification.

Melhuish's Technical Pattern Work Bench.

No. 1464w.
Made of selected and well-seasoned wood.
Length 5 ft. x 2 ft. wide x 30 in. high.
Price, with 2 Wood Bench Screws, 29/6
With 2 Iron Bench Screws of best quality, 37/6
With 2 Instantaneous Grip Iron Vices, each with 7 in. wide jaws, 55/.
With Hardwood Top, 6/- extra.

Tool, Machine, and Hardware Merchants and Manufacturers.
Workshop Stool.
New Pattern.
Of substantial make, and fitted with a Machine-cut Flat Thread Rising Screw.

Price 7/6 each.

" 1497w. Special Mahogany Chest, 6 Drawers, with secret locking arrangement, 5½ x 11 x 5 in. 12/- "

Chest of Drawers, 21 in. long, 12 in. high, and 11½ in. deep, Stained and Polished Mahogany. The 5 Top Drawers contain in each 32 Round Metal Boxes (160 in all), 2½ x 1½ in. deep, all with Glass Tops, thus enabling their contents to be seen at a glance without removing their covers, an advantage which is highly appreciated. The Bottom Drawer is empty, and is 5 in. deep.
Price 52/- each.

We fit up this Chest with an assortment of Screws, Brass Hooks, Eyes, Nails, etc., from our extensive stock of Cabinet Brass Foundry and Builders’ Hardware, at an extra cost of 10/-, 15/-, or 20/-, according to selection. Metal Boxes, as above, 2/- per doz.

Orders of 20/- and upwards Carriage Paid (with few exceptions).

All Empty Cabinets Carriage Forward.

All Cabinets priced "Without Tools" are fitted with Patent Instantaneous Grip Vice as "Excelsior" Cabinet. We would recommend the Carving Board Attachment to all our Cabinets as a very useful addition. It makes the Bench double the width.

N.B.—All our Cabinets are fitted with PATENT INSTANTANEOUS GRIP VICE, also RISING BENCH STOP, and 3 ft. STRAIGHT EDGE, all tools priced separately. (No extra charge for fitting them to Cabinets.)

We shall be pleased to estimate cost of making Cabinet to harmonise with any furniture; or will fit up customer's own tools if so required.

SPECIAL NOTE.—It will perhaps occur to some intending purchaser while perusing this section of our Tool Chests and Cabinets, that the lists of Tools with which we furnish these articles could be considerably augmented, in some details at least, without additional cost. To this we would reply that, while giving due and careful attention to the various and special needs of those for whom these Tool Chests and Cabinets are intended, our first consideration is QUALITY, and not quantity.

A large and varied Stock of Engineers' Tools and Motor Accessories.
"The Exonian."

Melhuish's Patent.

The whole of the Cabinet can instantly be closed and secured by a secret Lock with Small Key.

Bronze Medal, 1884.

£0 11:8

The Complete Set of Tools as above, £9 2:9.

Contractors to the Home, Indian, and Colonial Governments.

With all the latest improvements as in the “Exonian,” viz. The Extra Deep Cover with seven panels, two Flush Bolts, and the Extended Rails for holding tools.

Length 4 ft.  Width 1 ft. 9 in.  Height 3 ft. 3 in.

This design is fitted with Carving Attachment to enable the operator to sit at ease while at work; this adds double width to the bench.

“A place for everything, and everything in its place.”

No. 1500W. Prices complete with first quality tools as specified on next pages:

In Best Wainscot Oak; selected and best workmanship ................................................... £22:17:6
Extra if made with Ebonized Mouldings ................................................................. 0:7:6
In American Walnut, all extra quality Brass Work ............................................. 24:2:6

For prices of these Cabinets without tools, see page 205.

Bronze Medal, 1884.—Gold Medal, 1890.

R. MELHUISH, LTD., LONDON, E.C.

A large and varied Stock of Engineers’ Tools and Motor Accessories.
Wood-Turning Lathes.

No. 1503w.

A very strong and substantial design, suitable for general wood-turning, pattern- and cabinet-making, etc., etc.

The Bed is of strong cast iron, truly planed and scraped, and mounted on heavy iron standards, and the fast and loose Headstocks—cored castings in one piece—are accurately machined to fit bed.

The Spindles are of steel, and run in phosphor bronze adjustable bearings, and have front end screwed and bored for various kinds of chucks and centres; a tail pin bearing is fitted to take the thrust.

The four-speed Cone Pulleys are turned inside and out so as to be in perfect balance.

The price includes fast and loose Headstocks mounted on iron bed, suitable Countershaft, with Cone, Fast and Loose Pulleys and Belt Motion, improved Hand Rest to instantly fasten in any position by a handle attached to an eccentric shaft, Face Plate, two T Rests, Fork Centre, Dead Centre, Screw Centre, and set of Spanners.

---

**Tool, Machine, and Hardware Merchants and Manufacturers.**
**Rubber Bellows.**
(Tubing for connecting Cork Handles extra.)

**New Improved Foot Bellows.**
These are very practical and will be found most useful to all who do much poker work, as both hands are left free.

| No. 1532w | Complete with Bellows | 4/11 each. |
| No. 1553w | Complete with Best Bellows | 5/11 |

**Vulcanite Connection Cork.**
(Union)

| No. 1554w | -6 each. |

**Registered.**

| No. 1555w | - |

**"Pyro" Flame-Top.**
As supplied with the "Pyro" and "Grafton" Machines. It will fit the usual glass bottles sent with our Machines.

| No. 1558w | Complete Metal Bottle with regulating Top as used in "Simplex" Machines. 6/11 each. |
| No. 1559w | Nickel-Plated Spirit Lamp. As fitted in "Popular" and "Amateur" Machines. -5 each. |
| No. 1560w | Nickel-Plated Spirit Lamp. Made to fit our Poker Boxes. -9 each. |

**Glass Benzoline Bottles.**

| No. 1561w | Usual size … -4 each. |
| No. 1562w | Small size for "Amateur" Machine. -4 each. |

**Cork Handle to Regulate.**
The Benzoline Gas can, by turning the tap, be regulated so that the point may be kept at a constant dull heat, which is useful for shading and fine work.

| No. 1556w | -/11 each. |
| No. 1557w | Usual Cork Handle. -/6 each. |

Orders of 20/- and upwards Carriage Paid (with few exceptions).
**Sundries for Relief Poker Work.**

**Poker Spectacles.**
Made of plain glass to fit closely over the eyes, so as to protect them from the smoke of the pokeder material.

- No. 1573w. Black Leather... /5 each.

**Steel Wire Scraper.**
Made of extra strong Steel Wire for brushing off the charred surface of the wood, particularly for Backgrounds and other parts where it is difficult to reach with ordinary Wire Brushes.

- No. 1576w... /11 each.

**Steel Wire Brushes.**
Invaluable to Relief Burners for brushing off charred part of the wood, cleaning and smoothing.

- No. 1578w... 1 row... /3 each.
- No. 1579w... 2 rows... /5 each.
- No. 1580w... 3... /7 each.

**Set of Carving Tools.**
For Relief Poker Work.

- No. 1581w.
- No. 1582w.
- No. 1583w.
- Sections of Gouges, suitable for removing backgrounds of Relief Poker Work.

Complete with handles... /9 each.

See also pages 44-31.

**New Regulating Union.**
This Union can be regulated so as to supply the exact strength of Benzolene Gas that is needed to heat the point and also allow the use of fresh Benzolene.

- No. 1575w... 2½ each.

**Shading Attachment.**
Amateurs often find it difficult to keep the points at a regular low heat for doing fine shaded work. These attachments consist of a pair of thin metal springs (one broad and one narrow), which are held by a screw in such a position as to intercept the heat from the red-hot point and to give a comparatively low heat for doing shading work.

- No. 1577w... 1½ each.

**Collapsible Stand.**
To prevent upsetting the Benzolene Bottle.

- No. 1585w.
  Stand only... /5 each.
Platinum Points. Natural Sizes.

All Points are arranged to fit ANY of our Machines.

THE INITIALS "M. & C." STAND FOR QUALITY.

Shading Point.

For producing light or dark shades of a very soft tint. These Points are not to touch the wood, but are so constructed that they blow hot Benzeline-Gas upon the material and produce light or dark shades, according to a slower or more rapid pressure of the bellows. They are particularly useful in Portrait and Landscape Drawings.

Specially Constructed Points for Relief Burning.

Prices subject to alteration without notice.

Repairs Executed at Low Prices. Allowance made for old or damaged Points (Platinum parts) at more than the value of Fine Gold.

Contractors to the Home, Indian, and Colonial Governments.
Rd. MELHUISH, Ltd., Fetter Lane, Holborn Circus, London, E.C.

No. 1608w.

The "Original" No. 3 has a Standard "A" Platinum Point, best Bellowes. The Box is made of Polished Cherry Wood.

Price complete with Platinum Point (No. 1557w), 15/11 each. Extra Points, 8/4 each.

No. 1609w.

The "Popular" is a dark waxed Hardwood Box, with a "B" Platinum Point, Black Bellowes, Nickel Spirit Lamp. Price complete with Platinum Point (No. 1586w), 12/6 each. Extra Points, 6/4 each.

No. 1610w.

Small and handy for Travelling and Lessons.

No Spirit Lamp is needed.

Size 5/4 x 2 1/2 in.

The "Companion" is made to pack conveniently into a small space. No Spirit Lamp is needed, a horizontal Flame Top being provided which is fixed to the bottle when in use (as shown in illustration).

The "COMPANION" fitted with No. 3 Black Bellowes, No. 1586w, B Flat Platinum Point, etc.

Price 16/6 each. Extra Points, 6/4 each.

No. 1611w.

The "Amateur" is an efficient but inexpensive apparatus. It has a C quality Platinum Point, Black Bellowes, etc. Complete with Platinum Point (No. 1596w).

Price 10/6 each. Extra Points, 4/4 each.

Bronze Medal, 1884.—Gold Medal, 1890.
The "Pyro" Poker Machine.

No. 1612w.

The "Pyro" is a very handy machine, with an exceedingly simple flame or burner-top. The flame-top which takes the place of the Spirit Lamp in the "Original" Machines, is worked exactly like a gas jet, and burns entirely without smell. The Platinum Point is the standard quality, as fitted to "Original" No. 2 or 3, and the "Simplex" machine. The "Pyro" machine is cheaper than the "Simplex" on account of the simplicity of the flame-top.

The "Pyro" complete with Standard "A" Point (No. 1587w), 16/10 each. Extra Points, 8/4 each.

The "Simplex" Poker Machine.

No. 1613w.

The "Simplex" is so constructed that the Benzoine which is required to keep the Platinum Point red-hot is utilized also for heating the point at first, thereby dispensing with the Spirit Lamp used with the "Original." The flame is blue and perfectly smokeless. By turning the round Vulcanite Disc to certain marks, the Benzoine Gas supplies the Lamp, or it may be directed, by a turn, into the heated Point, and keeps this red-hot. By another turn, all escape from the bottle is shut off, and this can now be safely packed away and carried in any position.

The "Simplex" with Standard "A" Point (No. 1587w) complete, 22/6 each. Extra Points for the "Simplex," 8/4 each.

No. 1614w.

Special Machines for "Relief Poker" Work.

The "Griffin" Machine.

Fitted with extra large best Bellows, Size 6. Griffin No. III, with one Platinum Point (No. 1600w, large Bent Knife), 27/6 each.

The "Grafton" Machine.

Fitted with large best Bellows, Size 5, and "Pyro" Flame-top, making Spirit Lamp unnecessary. Grafton No. II, with Platinum Point (No. 1601w, Bent Knife), 23/6 each.

The Cheapest Reliable Watches ever made.

Just as an Advertisement we are offering these Fully Warranted Watches and Travelling Clocks at the extremely low price of 3/9 and 5/3 respectively.

"DEFIANCE." The "Defiance" Watch is strong, reliable, and accurate. The movement is regular 16-size, lantern pinions, American Lever escapement. Cases in Nickel and Gun-metal finishes (same price).

A Printed Guarantee given with each Watch.

"TWO-IN-ONE." The "Two-in-One" makes an excellent Paper Weight or Travelling Clock, and is useful in many ways about the house. It consists of a regular "Defiance" Watch fitted into a specially-made holder of unique construction. The outside holder can be had in a choice of finishes, Copper, Brush Brass, or Gun-metal, and is removable, thus leaving the Watch free to be worn in the ordinary way.

SEND FOR ONE OF THESE "SPLENDID VALUE" TIMEKEEPERS. WARRANTED!

Watch, 3/9; Case, 1/6 extra; Complete, 5/3.

R. MELHUISH, Ltd., 50, 51 & 84, Fetter Lane, London, E.C.

IMPORTANT TO THOSE ORDERING THROUGH SHIPPERS.—In order to ensure getting complete satisfaction, we advise our friends to be careful in giving definite instructions that the goods shall be procured direct from our house. By this means you may be sure of receiving the pattern and quality specified in our Catalogues.—Rd. MELHUISH, Ltd.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
Tools and Materials for Bent-Iron Work.

No. 1618w.
Candlestick.

Iron Sockets 1/8 each.
Copper 1/8

No. 1619w.
Fancy Candle Sockets.
Iron 1/4 each.
Copper 1/8

The Copper and Brass are beautifully polished by machinery, and will be found to be quite as pliable as our well-known Strip Iron. As these highly polished metals are very quickly tarnished by the atmosphere and hot hands, they should be lacquered at the earliest opportunity. Until this is done, or before using, it should be kept well wrapped up.

Best Quality Strip Iron, Copper or Brass, Framing Iron, Binding Wire, Iron Rivets, Copper Rivets

Special Thick Back and Fixed Blade Pattern, 2/6.

Plumbers' Irons.
No. 1705w.
Price 7d. per lb.

Patent Device for Bending Lead Pipes.
No. 1706w.

No Plumber can afford to be without it. Makes Bends any shape in a moment.

Drive the Plug provided through the pipe to take out any irregularities, should there be any, then put a few drops of oil on the spring. Place it inside the pipe and bend to the desired shape.

To remove the Bender from the pipe, after the bend is made, bend back a trifle on each bend, and then turn the Bender to the right, which decreases its diameter, and pull at the same. Every Bender is warranted if directions are followed.

Size...
1 1 1/2 1 4 2 3 3 3 4 in.
Price 1/9 2/3 3 4 21/6 each.

No. 1784W.

The Mixer.

For Decorators, Engineers, Paint and other Manufacturers.

A very convenient and efficient Machine, easily removed from place to place, and equally serviceable in mixing dry colours with oil, etc., as well as for thinning down paste paints, and quickly obtaining any tint that may be required.

The Mixing Pans are made of galvanised steel, fitted with Lifting Handles, and easily detached either for emptying, cleaning, or change of colours. The Beaters are raised by a single stroke of the Hand Lever, and the Pan and Beaters are driven by means of a cluster of three smooth-running Bevel Wheels.

Working capacity, 2½ gallons.

Size of Steel Pan, 12 in. diameter by 8 in. deep.

Floor space, 29 in. by 16 in.

Price, Hand Power, £5:2:6

Price, With Pulleys, £6:2:6

Contractors to the Home, Indian, and Colonial Governments.
The New Mixer.

No. 1785w.

This pattern has been specially designed to meet the demand for a Paint Mixer strongly built, suitable for hard wear, and low in price. The Bed and Columns are of solid Cast Iron, and motion is given to both Pan and Beaters by a cluster of three machine-moulded Bevel Wheels.

The Detachable Pan is of Steel, strongly and rigidly built, and is fitted with Lifting Handles and special Lever Discharge Valve. The Beaters are raised and lowered by means of a double-threaded machine-cut Screw actuated by a heavy Hand Wheel.

(Extra Pans supplied to order, £2 : 10 : 0 each.)

Carriage Forward. Packed for Export, 5 per cent. extra.

This section of our Catalogue contains the leading lines in Woodworkers', Painters', and Plumbers' Tools, Machines, and Accessories. Other sections, embracing a great variety of Engineers' Tools, Machines, and Appliances, Electrical Goods, Motor Tools, Horticultural and Estate Agents' Requirements, Builders' and Furnishing Ironmongery, etc., will be sent per post on application.

Bronze Medal, 1884.—Gold Medal, 1890.
Vertical Mixing Mill.

No. 1786w.

This pattern has been designed for thoroughly mixing comparatively small quantities of ingredients, and will be found exceedingly useful, especially when quick change of colours is desired. The Hoppers have a capacity of 6 gallons, are made of cast-iron, and lined inside with a thick coating of durable White Vitrified Enamel. They are particularly easy to empty and clean out.

The pugging arrangement is strong enough to mix the stiffest pastes, putty, and the like, and will also mix semi-liquids in varnish or oil with equal facility.

Size of Hopper: 12 x 16 in.
Revolution of Pulleys per minute: 60 - 80
Floor Space: 18 x 18 in.
Price, Hand Power with Fly Wheel as illustrated: £7 5:0

Can be supplied with Pulleys for power.

Vertical Pug Mill.

For White Lead, Paints, etc., etc.
No. 1787w.

This Mill is substantially built throughout, and when secured to a firm foundation runs steadily with a full load. By turning the hand wheel whilst the Machine is working, a carefully machined watertight sliding door is opened and the contents are quickly run off.

Size of Mill: 18 x 17 in.
Capacity: 15 gallons.
Floor Space: 26 x 22 in.
Weight: 5 cwt.
Price: £21 0:0

When so ordered, the interior of pan, as well as the beaters, may be covered with a thick coating of White Vitrified Enamel at a small extra charge.

Carriage Forward.

Tool, Machine, and Hardware Merchants and Manufacturers.

Bronze Medal, 1884.—Gold Medal, 1890.
Navvy Barrows.

Standard pattern, of seasoned Hard Timber and Jacob’s pattern Wood Wheels.

Frame bolted with 4 in. Bolts and Nuts. Body of 1 in. wood and measuring at bottom 15½ in. long, 10½ in. wide at front, and 15 in. at back. Depth at front 11½ in., back 7½ in. Inside, 26 in. back, 19 in. front, 29 in. length. Wheel is 18¼ in. diameter, and bound with 1¼ in. Iron Tyre.

Price 13,6 each. No. 1879w. With Iron Wheel, 12,6 each.

Tubular Frame Mining Wheelbarrow.

No. 1880w.

New pattern. Steel Body Stamped in One Piece.

Prices:

- Japanned all over.... 22,6 each
- Galvanized Body and Japanned Frame... 27,6
- Galvanized all over... 32,6

New Pattern Barrow.

Made of best selected English Hardwood, and well painted.

No. 1881w.

Size of Wheel. 18 in.
Size of Body. 28 x 24 in.
Price. 27,6 each.

Same make Barrow as No. 1881w, but with top boards 7 in. deep.
Price 39,6 each.

Barrow.

No. 1883w.

Galvanized Bodies.

The "Perfection" Chemical Fire Extinguisher.

No. 1905w.

This is a small Hand Fire Engine, made of Heavy Solid Copper throughout, and tested and guaranteed to stand a pressure of 350 lb. per square inch (about five times the pressure generated when in use). It also affords the cheapest method of protection from fire yet devised. There being no intricate mechanism or striking apparatus to break bottle, cocks, gauges, plunger, or valves to puzzle the operator and delay its use in time of need, there is no possibility of its getting out of order.

Can be instantly operated by any person, however strange they may be to the machine, and there are no complicated instructions to read before using; all you have to do is merely TURN THE MACHINE UPSIDE DOWN.

When instantly you get a 50-ft. stream of fire destroying fluid, the last drop going as far as the first, and as destructive to flames in oil, tar, spirits, petrol, kerosene or gasoline as in burning wood. Equal to over 160 times the same amount of water in extinguishing fire, and is far superior to unreliable dry powder tubes or hand grenades.

The chemical stream is not injurious to either person, fabric, or furniture.

Cost of refilling only a few pence.

Bronze Medal, 1884.—Gold Medal, 1890.
Earth and Well Boring Tools.

For a Set of Boring Tools for 50 ft.

**Estimate No. 2.**

- One 3½ in. and 2½ in. Clay Augers.
- One 3 in. and 2 in. Shoe-nose Shells, with Valve.
- One 3½ in. and 2½ in. Flat Chisels.
- One 3½ in. and 2½ in. T Chisels.
- One Worm Auger.
- Ten 5 ft. lengths 1 in. square Boring Rods.
- One pair of Tillers. Two Hand Dogs.
- Two Lifting Dogs. One Snatch Block.
- One Spring Hook and 30 ft. of Rope.
- One Short Swivel Rod.
- One Auger Board. One Auger Clearer.

**Price**... ... ... £26 : 15 : 0.

Extra 5 ft. lengths of Rod for Boring to increased depth, 15/6 each.

If the 2½ in. Tools are omitted, deduct from Estimate £4 : 15 : 0.

Extra for one set of Iron Tubular Shear Legs with Windlass, £12.

For a Set of Boring Tools for 100 ft. or upwards.

**Estimate No. 3.**

- One each 4½ in. and 3½ in. Clay Augers.
- 4 in. and 3 in. Shoe-nose Shells.
- 4½ in. and 3½ in. Auger-nose Shells.
- 4½ in. and 3½ in. Flat Chisels.
- 4½ in. and 3½ in. T Chisels.
- One Worm Auger. One Bell Screw.
- Two Lifting Dogs. Two Hand Dogs.
- One pair of Tillers. One Snatch Block.
- Ten 10 ft. lengths 1 in. Boring Rods.
- One Short Swivel Rod.
- One Spring Hook, with 30 ft. of Rope.
- One Auger Board. One Auger Clearer.

**Price**... ... ... £37.

Extra for a Set of Ironwork for Shear Legs, £2.

Extra for a best Iron-bound Well-sinker’s Windlass, complete, £12.

Extra for a Set of Iron Tubular Shear Legs, instead of Set of Ironwork for Shear Legs and Well-sinker’s Windlass, £12.

If required to bore beyond 100 ft., add for each 10 ft. length of 1 in. square Boring Rod, 17.6.

If Auger-nose Shells are omitted, deduct £4 : 15 : 0.
If 3½ in. Tools are omitted, deduct £7 : 15 : 0.

For a Set of Boring Tools for 200 ft. or upwards.

**Estimate No. 4.**

- One each 5½ in., 4½ in., and 3½ in. Clay Augers.
- 5 in., 4 in., and 3 in. Shoe-nose Shells.
- 5½ in., 4½ in., and 3½ in. Flat Chisels.
- 5½ in., 4½ in., and 3½ in. T Chisels.
- One Worm Auger. One Bell Screw.
- Two Lifting Dogs. Two Hand Dogs.
- One pair of Tillers. One Snatch Block.
- Twenty 10 ft. lengths 1½ in. Boring Rods.
- One Short Swivel Rod.
- One Spring Hook, with 30 ft. of Rope.
- One Auger Board. One Auger Clearer.

**Price**... ... ... £65 : 10 : 0.

Extra for a Set of Ironwork for Shear Legs, £2.

For a best Iron-bound Well-sinker’s Windlass, complete, £12.

Extra for a set of Iron Tubular Shear Legs, with gearing No. 35, instead of Set of Ironwork for Shear Legs and Well-sinker’s Windlass, £32 : 10 : 0.

If required to bore beyond this depth, add for each 10 ft. length of 1½ in. Rod, with coupling screw, £1 : 2 : 6.

A spare set of Bottom Tools, consisting of one Auger, one T and one Flat Chisel of each size, and also three spare Male Screws, in case of breakage, will cost £13 : 15 : 0.

If Auger-nose Shells are omitted, deduct £7 : 15 : 0.
If 3½ in. Tools are omitted, deduct £8.

For a Set of Boring Tools for 300 ft. or upwards.

**Estimate No. 5.**

- One each 6½ in., 5½ in., and 4¼ in. Augers.
- 6 in., 5 in., and 4 in. Shoe-nose Shells.
- 6½ in., 5½ in., and 4½ in. Auger-nose Shells.
- 6½ in., 5 in., and 4½ in. Flat Chisels.
- 6½ in., 5½ in., and 4½ in. T Chisels.
- One Worm Auger. One Crow’s Foot.
- Two Lifting Dogs. Two Hand Dogs.
- One pair of Tillers. One Snatch Block.
- One Short Swivel Rod. One Bell Box.
- One Spring Hook, with 30 ft. of Rope.
- One Auger Board. One Auger Clearer.

**Price**... ... ... £90.

Extra for a Set of Ironwork for Shear Legs, £2.

For a Double-gear, extra strong, best Iron-bound Well-sinker’s Windlass, complete, £24.

Extra for a set of Iron Tubular Shear Legs, with gearing, instead of a Set of Ironwork for Shear Legs and Well-sinker’s Windlass, £32 : 10 : 0.

Extra if fitted with Fast and Loose Pulleys, £6 : 10 : 0.

If required to bore beyond this depth, add for each 10 ft. length of 1½ in. Rod, with Coupling Screws, £1 : 2 : 6.

A spare set of Bottom Tools, consisting of one Auger, one T, and one Flat Chisel of each size, and also six spare Male Screws, in case of breakage, will cost £18 : 10 : 0.

If Auger-nose Shells are omitted, deduct £9.

Carriage Forward.

Important to those Ordering through Shippers.—In order to ensure entire satisfaction, we advise our friends to be careful in giving definite instructions that the Goods shall be procured direct from our house. By these means they may be sure of receiving the pattern and quality specified in our Catalogue.

RICHARD MELHUISB, LTD., London, E.C.

Boring Machine for Rock or Coal.

No. 1917W.

The above Machine will bore any material capable of being penetrated by a Rotary Drill. The feed is perfectly automatic, and is so arranged that the screw may be instantly withdrawn to change drills. The Standard is so constructed that it can be extended from its shortest length to within about one foot of double that length.

All the parts of this Machine required to withstand strain are made of steel, thus ensuring the greatest possible strength combined with lightness. The Standards are made in four sizes, viz. 2 ft. 9 in., 3 ft. 9 in., 4 ft. 9 in., 5 ft. 9 in., when closed.

B. With 2 centre balance wheels and 1 wheel at each end 1:12:6

A large and varied Stock of Engineers' Tools and Motor Accessories.
London Pattern Sack Truck.

Nos. 1 and 2.

These Trucks are made with Hardwood Frames; straight sides and strong cross-bars, slightly curved on the tops; the Shoe is solid forged iron; the Wheels are strong solid-webbed; the Axles are inch round and revolve in Patent Bearings, which lessen friction and draught, and considerably reduce the wear. The Woodwork is unvarnished, and the Ironwork painted black.

India Rubber Tyres:

No. 3, 15/-; No. 4, 14/-; No. 5, 17/6 extra.

Contractors to the Home, Indian, and Colonial Governments.
Wood Boring Machine.

No. 1979w.

The frame is made of half-inch round steel rods; the braces are the same, and attached to the rods at the top by a set screw. When this set screw is loosened, the frame falls over so as to bore at any desired angle.

The depth of hole to be bored is fixed by a stop, as seen on the left-hand upright rod in the cut. When the frame strikes this stop, lift the latch, and the machine throws itself into gear by the use of a spring, and the Auger is lifted out of the hole by continuing to turn the crank in the same direction.

When the Auger is drawn from the hole, the frame hangs itself up until the machine is moved to the next hole; then it is dropped down by turning the crank back until the Auger strikes the wood, when it is thrown out of gear, and proceeds to bore the next hole. As seen in the cut, the machine has adjustable cranks, which fully regulate its speed and power.

No. 1987w.

Suitable for driving Circular Saw, Lathe, or small Machine. Well finished, 18 in. diameter, weight 60 lb. complete.

Price ... 29/-

Carriage Forward.
Tool, Machine, and Hardware Merchants and Manufacturers.
Patent Improved Foot Power Scroll Saw.

No. 1988w.

Height from floor to top of Table, 38 in.

Weight, 56 lb.

The Victoria Saw Blades.

No. 1989w.

These Saw Blades are of superior quality, temper, and finish.

Nos. 4, 8, and 12 are tempered for cutting in wood, bone, shell, and soft metals; and Nos. 20, 25, and 30 for cutting in woods. The latter have relieved back, set teeth, and can be filed.

Prices:

Nos. 4, 8, and 12 ... 1/- per doz.

20, 25, ... 30 ... 2/- ...

This is a very powerful Saw, starting instantly the treadle is pressed down, very easy motion, and with reasonable practice will cut Fine Wood 3 in. thick, at the rate of 1 ft. per minute, or Walnut, 1 in. thick, 2 ft. per minute; other woods and thicknesses in proportion.

The space under the arm from the Saw is 24 in., and the Saws are 7 in. long. The Table and Arms are of Hard Maple, and the Frame is cast iron, strong, yet light.

The Balance Wheel runs on a steel arbor.

We include one dozen Saws with each Machine.

This Machine is designed for practical service in the workshops of Cabinet Makers, Carpenters, and Builders, and other workers in wood.

Price £3 : 5 : 0 complete, packed safely in case. Machine takes 8 in. saws.

Carriage Forward.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
The "Improved" Scroll Saw, for Foot or Power.

A thoroughly practical, strong and durable machine, designed for carpenters, builders, cabinet makers, and general workshop use. It will cut up to 3 in. thick and swing 24 in. The arms have an almost straight up-and-down motion and are arranged to use regularly 8 in. saw blades, but can be easily adjusted to use 5 in. blades for light work.

The iron tilting table, turned true and polished, can be changed to any angle for sawing inlaid work.

The adjustable upright Drilling arrangement is provided with an improved Drill Chuck, which holds from 0 to 2 in. Twist Drills.

The 24 in. Driving Wheel, fitted with a ½ in. V Belt, whereby great efficiency without slipping or lost motion is obtained, is worked by a double-foot treadle having a walking motion, by which much greater power can be obtained with less fatigue than by any other kind in use. Average speed, 800 strokes per minute. Height from floor to top of table, 40 in. Weight 165 lb.

Price complete as shown, with 1 doz. assorted Saw Blades, Twist Drill and Wrench... £6 : 17 : 6
Without Drilling Arrangement... 5 : 17 : 6
Fast and Loose Pulleys for power... 1 : 5 : 0

The "Victoria" Lathe.
The "Victoria" Lathe Attachment can be attached to this Machine in the same manner as the Table.

Price... £2 : 7 : 6

The "Victoria" Scroll Saw.
For Foot or Power.

A machine of large capacity, suitable for close and very accurate work. It will cut with the greatest precision up to 3 in. thick, and has a 24 in. swing.

It has an adjustable tension in connection with the upper spindle, which may be varied to suit the operator, using regularly 8 in. saw blades, but can be adjusted to use 5 in. blades for fine work if desired.

The iron tilting table is 16 inches in diameter, and can be changed to any angle for sawing inlaid work; the table and all finished parts are nickel-plated.

The Driving Wheel with V Belt, the Drilling Attachment, and the Double Foot Treadle are the same as in the "Improved" Scroll Saw described above.

Average speed, 800 strokes per minute. Height from floor to top of table, 40 in. Weight complete, 250 lb.

Complete, as shown, with 1 doz. 8 in. assorted Saw Blades, Twist Drill, and Wrench... £8 : 17 : 6
No. 1991 w. Without Drilling Attachment... 7 : 17 : 6
For Power only, arranged to fasten to a work bench, with Fast and Loose Pulleys, no Drilling Attachment... 5 : 17 : 6

Carriage Forward. Free on Rail. London.

A large and varied Stock of Engineers' Tools and Motor Accessories.
Combination Saw.

No. 1992W.

This Machine is the same as the one shown on opposite page, but without the Self-Feed Ripping Device, Left-hand Ripping Gauge, Front Extension Roll, and other parts pertaining to same.

As Illustration, with one each 7 in. Rip and Cross-cut Saws,

£14 : 5 : 0

N.B.—This price does not include Groover Head, Boring, Moulding, or Scroll Saw Attachments.

Carriage Forward.

SHIPPING DIMENSIONS:

Length, 42 in.; Width, 35 in.; Depth, 32 in.
Gross Weight ..... 520 lb.
Net ..... 380 lb.

No. 1993W.

Patent Groover Head.

For cutting Grooves from \( \frac{1}{8} \) in. to 2 in.

This consists of two outside cutters, each of which is a groover in itself, and as many inside cutters as required. The inside cutters are made \( \frac{1}{8}, \frac{3}{16}, \) and \( \frac{1}{4} \) in. thick, so that any width groove (above \( \frac{1}{4} \) in.) measurable in sixteenths may be cut. The outside cutters furnished with all Groover Heads are made \( \frac{1}{2} \) in. thick, but we can furnish extra outside cutters \( \frac{1}{8} \) and \( \frac{1}{4} \) in. thick. The outside cutters can be used singly, together, or in connection with as many or as few inside cutters as required to cut the necessary width groove. It will cut a perfect groove, either with or across the grain, and will not leave a rough edge, as is the case with ordinary groovers.

The Groovers are arranged in Sets as follows:

No. 1 Set, Cutting Grooves \( \frac{1}{8}, \frac{3}{16}, \frac{1}{4} \) in. | No. 3 Set, Cutting Grooves \( \frac{1}{8}, \frac{3}{16}, \frac{1}{4}, \frac{1}{2}, \frac{3}{16}, \frac{1}{4}, \frac{1}{2} \) in.

In ordering, please state the number of set, diameter of Groover, and size of hole wanted. A wire gauge for hole is preferable. Extra Inside or Outside Cutters can be had at any time.

We can furnish any size Groover Head from 6 in. to 12 in. diameter for cutting any width groove from \( \frac{1}{8} \) in. to 2 in., suitable for Heavy Power Machines, for which prices will be given on application. State diameter of Groover Head and size of hole desired. To order only.

Contractors to the Home, Indian, and Colonial Governments.
Combination Saw.
No. 1994W.

This New and Improved Combination Circular Sawing Machine with Self-feed Ripping Device, etc., is a marvel of ingenuity, convenience, and practicability. It is designed for Carpenters, Cabinet, Picture Frame, Box, and Bee Hive Makers, and woodworkers generally. It is a very strong, substantial, and thoroughly well-built Machine, suitable for various kinds of work in Ripping, Cross-Cutting, Mitreing, etc.; also with the addition of the extra attachments, Rebating, Grooving, Gaining, Dadoing, Boring, Scroll Sawing, Edge Moulding, Beading, etc. It can be easily and quickly changed from a Self-feed Ripping Machine to a Cross-cutting Machine. It has a strong, heavy, solid Iron Frame, Steel Shafts, and Babbitt-metal Lined Boxes, adjustable to take up the wear. The power is transmitted entirely by Gears and Chain Belt, thus doing away with any slipping or lost motion. All Gears are cut by Automatic Machinery and run smoothly.

The Foot Power has a walking motion, by which much greater power can be obtained with less fatigue than with any other kind in use, and it enables the operator to run the Machine with both feet, sitting, or one foot, standing, as desired.

It is provided with two Hand Powers—one for the Self-feed, ripping wood 3½ in. thick, and the other for Cross-cutting, etc., arranged to allow the operator a natural, upright, and easy position. The Hand Power at rear of Machine leaves an entirely Free Table for Cross-cutting (any length), Dadoing, etc.

Shipping Dimensions.—Gross weight, 655 lb.; net ditto, 490 lb.; length, 41 in.; width, 35½ in.; depth, 36 in.

Complete as Illustration, with one each 7 in. and 10 in. rip saw, and 7 in. cross-cut saw. Size of Table, 28 in. wide, 36 in. long.

Price, packed securely in strong case ... ... ... £17:18:0 Free on Rail. London.

For Groover Heads, also Boring, Moulding, and Scroll Saw Attachments for this Machine, see pages 262 and 264.

Price ... ... ... £9:17:6 Countershaft, 50/- extra.

Bronze Medal, 1884. — Gold Medal, 1890.
Boring Attachment

This is a thoroughly practical and substantial Attachment. It is held in place by means of a Bolt and Thumb Nut, and can be put on or taken off as readily as changing a saw.

It has an adjustable Sliding Table, which is so constructed as to secure perfect accuracy in the up and down Adjustments, and is arranged to slide to and from the Bit; also provided with a Stop to gauge the depth of hole.

It has a Steel Spindle arranged with Socket, which will securely hold % in. round straight Shank Bits.

It is driven entirely by Gears, and is very powerful in its action.

Net weight, 38 lb.
Price, in strong Case, 48/6

Moulding Attachment

For Nos. 1992w and 1994w Combination Saws.

This also is a valuable Attachment, and can be quickly and securely placed in position ready for use. It is designed for Edge Moulding, Beading, etc., using our Moulding Cutters.

Made entirely of Iron and Steel, simple in construction, compact and durable.

It is driven by Spur and Bevel Gears in connection with the Saw Arbor.

The Spindle has a Vertical Adjustment for different thicknesses of work, and is made to rotate in either direction to suit the grain of the wood.

The speed by either Foot or Hand Power is such as to ensure smooth, clean, and rapid work.

Price, in strong Packing Case, 38/6

Scroll Saw Attachment

This handy and useful Attachment can be easily and quickly placed in position ready for use, making a strong and serviceable Scroll Saw with large capacity.

It will cut up to 3 in. thick, and swing 24 in.; the Adjustable Saw Clamps, Arms, and Rocker Motion are the same as used on our large Scroll Saw.

Net weight, 15 lb.
Price, with 1 doz. 8 in. Assorted Saw Blades, packed in strong Case, 38/6

Tool, Machine, and Hardware Merchants and Manufacturers.
Barnes’ Improved Foot-power Former, No. 2.

This is a Machine for moulding edges of brackets, scroll work, panel work, regular and irregular mouldings of all styles up to $\frac{3}{4}$ in. The speed of the knives is from twenty to twenty-five hundred per minute. By the aid of our

**PATENT VELOCIPEDE FOOT-POWER**

the knives are, at the will of the operator, caused to rotate in either direction that the grain of the wood may require, thus avoiding all complicated devices for reversing motion usually employed on single-spindle formers. The great speed of the knives ensures rapid and smooth work. Articles that look very plain can be made costly and elegant in appearance by the rapid and perfect work of this Machine.

The spindle and its bearings are of cast steel, with adjustments to take up the wear. The parts to set the machine for the use of different knives and work are convenient, substantial, and durable. The table can be lowered to give $2\frac{1}{4}$ in. between it and the lower cutting edge of the knife.

The Machine, complete, weighs 80  lb.

<table>

The above illustrations show a few of the Mouldings for which we supply the Cutters for above Machine. These Cutters enable any one to make special mouldings for their work, or to shape the edges of the panels and various parts of furniture, thus adding greatly to the appearance at a very triling cost.

In ordering Cutters, give the Numbers required. Complete list of Cutters sent on application.

Cutters for above Mouldings, price 4/- each.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
Illustrations of Mouldings made by Barnes’ New Patent Cutters.

Complete List of Cutters sent on application.

The illustrations shown above give some of the forms of Mouldings and Beads that may be made by the new pattern knives we now supply. The changes that can be made by the use of these new cutters are almost endless, and the usefulness of the former is very greatly increased, making it one of the most valuable machines that a Cabinet-maker can have. We give illustrations of the forms of these cutters, which are designated by the letters on them.

They are made in three sizes, viz., 1, 2, and 1 1/4 in.; and while it is intended that knives of one size shall be used in combination, it is not imperative, and the different sizes may be used in one combination.

In ordering these knives, the letters as well as the size should be given.

In order to aid our customers in sending for cutters, we give in the following table the letters required to form the combinations shown in the illustrations:

Phosphor-bronze bearings for 9-in. Saw, 21/- extra.  

These Illustrations represent our Circular Saw Benches, which are made in two sizes, and are designed for cutting Wood, Vulcanite, and Stereo and other Soft Metals.

SPECIFICATION.

The Table is an accurately planed surface and is hinged, so that by means of the Elevating Screw the amount of saw projecting through table can be varied. The table and spindle supports are one casting; by this means the alignment of the principal parts of the machine are always correct.

The Spindle is of steel, with glass hard ends and revolves on glass hard centres, making a very light running machine especially when used for foot.

(The 12-in. size being used for heavier work, the Spindle revolves in adjustable Phosphor-Bronze Bearings.)

(The 9-in. size can also be supplied as above, but must be ordered so, as the price is slightly more than when fitted with centres.)

The Straight Guide is adjustable so that various widths can be cut.

The Angular Guide, as shown in illustration, has a constant angle of 45 degrees. Holes are drilled on face so that pieces can be fixed on to suit the desired constant angle required.

(An adjustable Mitre Guide is also made to suit those who require this type, which swivels at 45 degrees each side of zero. This can be supplied in place of the Constant Angle Guide, the difference in price being slightly more.)

The Saws are accurately set and tempered, and are 8 in. diameter on the 8 in. machine and 12 in. diameter on the 12 in. machine. The machines are complete with saws and exactly to illustrations (unless otherwise ordered). The machines will take in saws 9 in. and 15 in. respectively.

Bronze Medal, 1884.—Gold Medal, 1890.
Improved Fret Sawing Machine.
With Self-contained Arm.

No. 2011W.

This improved and latest designed Fret Sawing Machine is suitable for all kinds of internal and external scroll and fret sawing where a hand saw cannot be used.

The machine consists of a frame in one piece, of strong cored section, to which are fitted the table and arm. The slide rod, etc., work in long gun-metal bearings; the end connections to connecting rod are also of gun-metal, and suitable for a high rate of speed.

The saw is strained by means of a spiral spring, the tension of which can be conveniently adjusted by means of screw and hand nut. The machine is complete with Fast and Loose Pulleys, Belt Motion, and six Saws.

For Tenoning, Grooving, Boring, Rabbeting, etc.

No. 2012W.

The frame of machine is a strong cored casting in one piece, the table is made to rise and fall by means of a hand wheel and screw in planed V slides. The canting fence is adjustable in every way and swings clear over table for cross cutting. The saw spindle is made of steel with adjustable lock-nuts for taking up wear, runs in gun-metal bearings, and has an outside arm bearing. Fast and Loose Pulleys, Lever Belt Guide, and Spanners are included. It is a high-class bench, suitable for a variety of work, convenient, and occupies little space.

Free on Rail at Works. 7½ per cent. extra f.o.b. Liverpool; 10 per cent. extra f.o.b. London.

Tool, Machine, and Hardware Merchants and Manufacturers.
The Hand and Steam Power Central Rack Rising Top Saw Bench.

For Tenoning, Grooving, Jointing, Rabbeting, Cross Cutting, etc.

No. 2013w.

We recommend this Bench to users who at present have no power, but who require an efficient machine which is properly constructed to run by power when required; or for shops where steam power is not always available.

The Frame of machine is a strong cored casting in one piece. The Table is made to rise and fall by means of a hand-wheel and screw in planed \( V \) sides. The Canting Fence is adjustable in every way, and swings clear over Table for cross-cutting. The Steel Spindle is fitted with adjustable lock-nuts to take up all end wear in necks and runs in gun-metal bearings. The machine is finished in best style, and is a substantial, useful, and cheap tool.

New Improved Hand Power Circular Saw Bench.

Will cut 4½ in. deep.

**No. 1.**

With Fly-Wheel and Self-Acting Feed Motion, Table 48 x 24 in., heavy and planed true, Rising and Falling Spindle, Self-Acting Motion, Parallel Canting Fence which turns over end of Bench for cross-cutting, Sliding Roller and Weight, one each 9 and 14 in. Circular Saws, three Change Wheels for speed motion, six Rollers and Carriers for extending Bench, and Spanner.

**No. 2.**

Frame and Table as No. 1, but specially designed to overcome its limitations to cross-cutting, the fly-wheel being moved from the saw spindle to a back shaft fitted on one end, driving being effected by means of chain. The table has long groove cut for sliding cross-cutting and mitreising fence, which can be supplied with the machine. Saw spindle is a fixed one. Complete with parallel canting and turn-over fence, two Saws, and necessary Spanner.

Both machines can be fitted with BORING APPARATUS, consisting of adjustable bracket, sliding fence and one patent auger. Also with special TENONING APPARATUS to take in wood up to 3 x 9 in. consisting of slide and holder for holding timber in vertical position, and one extra 14 in. diameter saw.

**Prices: No. 1.**

- If complete with Feed Motion, Two Saws, Rollers, and Carriers: £12:10:0
- If without Feed Motion, Rollers, etc. (plain bench): £10:10:0
- If prepared to work either by Steam or Hand: extra £0:10:0
- If fitted with Patent Drag Motion in addition to above feed: £1:10:0

**No. 2.**

- As specified, complete with Two Saws and Spanner (no feed motion): £12:10:0
- If as above, with Boring Apparatus, Sliding Table, and one Patent Auger for either Machine: extra £12:0:0
- If fitted with Sliding Fence for Cross-cutting or Mitreising for either Machine: £0:10:0
- If fitted with Tenoning Apparatus and one extra 14 in. diameter Saw for either Machine: £3:10:0

A large and varied Stock of Engineers' Tools and Motor Accessories.
These Machines, recently strengthened and improved, meet all the ordinary requirements of the trade, and, although cheap, have that standard of excellence ascribed to our other manufactures.

The Table is planed and grooved in inches parallel to the fence, and can be raised or lowered while the saw is running.

The Spindle is of Steel, bored out at end to suit boring bits, and runs in three long gun-metal bearings.

The Fence is adjustable every way, and swings clear over end for cross-cutting; is fitted with fine thread Screw Adjustment, operated by hand-wheel, and, when returned from angle-cutting, is absolutely square.

The Belt Shifter is of the self-locking type, preventing accidents from belt moving on to either pulley.

All Adjustments are simple, and have been placed in convenient working positions.

BORING AND MORTISING ATTACHMENT (as illustration) bolted firmly to machine, consists of cast iron stand with vertical and horizontal slides, having compound table, operated by means of levers and screws, suitable stops being provided.

Heavier Pattern, with 4 Corner Racks, can be supplied at an increase of 10 per cent. on following prices:

Rope and Roller Feed Saw Benches at similarly low prices.

SAWS EXTRA.

Free on Rail at Works.

Contractors to the Home, Indian, and Colonial Governments.
Patent Self-Compensating Circular Saw Guard.

It is adaptable to every make of saw bench, being easily fitted to table by an ordinary workman.

It consists of a shield (a) completely covering the saw, attached to a stand (b) (bolted to the back corner of table) by means of arms (c), compensating lever (d), and adjustable horizontal bracket (e).

Any thickness of wood can be worked. The contact of the timber at j serves to raise shield sufficiently to allow it to pass. On completion of cut the shield falls back automatically to table.

The tightening of wing nut (f) retains the shield at any given height, such as ripping large quantity of timber of a given thickness, or holding the guard clear when sharpening or changing saws. Lines 00 and hh respectively show this on the illustration. jji shows guard resting on table, automatically covering saw when cut is completed.

IMPORTANT REASONS WHY YOU SHOULD FIT THIS GUARD TO YOUR SAW BENCHES:

1. Gives complete protection, decreasing sawyers’ risks, that part of saw not required being covered.
2. When cut is made, the shield automatically covers whole of saw.
3. Construction being substantial, there is no possibility of saw coming into contact with shield, the vertical movement being parallel.
4. Self-adjusting to thickness of timber being worked, without attention from the workman, whether ripping, cross-cutting, or wedge cutting. Permits sawing to the fullest capacity of saw, and does not interfere with fence plate adjustment.
5. Has the fullest approbation of Factory Inspectors.
6. Guarantees immunity from accidents, preventing ruination to uninsured.
7. Substantial rebates of insurance premiums may be secured.

Bronze Medal, 1884.—Gold Medal, 1890.
Improved Hand Power Saw Bench.

No. 2018W.

This Improved Hand-Power Saw Bench is especially useful where steam power is not available.

It has variable speeds for light or heavy work, and can be worked by one or two handles according to the thickness of sawing required.

The Table is 4 ft. x 2 ft., and has Rising and Falling Spindle for rebating, grooving, and tenoning. It is fitted with Self-acting Drag Motion for feeding the timber, Steel Spindle and Gun-metal Bearings, Adjustable Canting Fence, and Boring Apparatus as per illustration.

This machine is well suited for foreign shipment, and can be packed in one case.

Tool, Machine, and Hardware Merchants and Manufacturers.
Roller-Feed Panel Planing and Thicknessing Machine.

Adapted for planing boards, panels, etc., etc., in hard and soft woods from 3/8 to 17 1/2 in. thick. The Frame is a heavy box-section casting in one piece, absorbing all vibration while working, and requiring no special foundation.

The Spindle and Cutter-Block are machined from one forging of special steel and carefully balanced; they run in special bearings of phosphor-bronze, extra long, dust-proof and self-oiling by means of oil well and rings which automatically cover the shaft with oil when running. This improvement enables the machine to be run at a high speed with but little attention.

The Bottom Table has rising and falling motion by turning the Handwheel in front, and a Gauge is provided to enable the operator to set the machine to plane the required thickness.

The Steel Feed-Rollers are of large diameter and can be instantly stopped without stopping the Cutter-Block. The Feed Gearing is on one side of the machine, out of the operator's way and securely guarded; it has three rates of speed to suit woods of varying hardness.

The price includes a suitable Countershaft, with Fast and Loose Pulleys, Belt Motion, and one pair of full-sized Plane Irons and Set of Spanners.

7 1/2 per cent. extra f.o.b. Liverpool; 10 per cent. extra f.o.b. London.

Orders of 20/- and upwards Carriage Paid (with few exceptions).

No. 2020W.

This Machine being of very recent design, includes all possible up-to-date improvements. The frame is cast in one piece and well proportioned, thereby securing strength and rigidity. It is fitted in a first-class manner, and no spanners are required for adjustments. The Sliding Box carrying the top pulley can be readily adjusted whilst the machine is in motion, so that the Saw can be made to run accurately on any part of the face of the pulleys. There is a Spring Tension to compensate for expansion and contraction of saw. The Pulleys, which are covered with India rubber Bands, are light, strong, truly turned and balanced, thus enabling the machine to be run at a high speed. The shaft runs in long gun-metal bearings. The machine is fitted with Patent Saw Guides, both above and below the table, and are adjustable to take in wide or narrow Saw Blades. The table will cant or swivel to any angle for the purpose of bevel and straight cutting. A brush is fitted to keep the bottom Saw Pulley clear from sawdust. For the protection of the workman, the Saw is fitted with Iron Guard in front and Wood Guard on the side. It is complete with one 2 in. French Band Saw and Spanner.

Cuts 6 in. deep and admits work 12 in. deep.

Speed, 180 revolutions per minute.

Free on Rail at Works.

A large and varied Stock of Engineers' Tools and Motor Accessories.
The "Compactum" Band Sawing Machine.

No. 2022W. These 20 and 24 in. Machines are handy, occupy but little space and require small amount of power to drive. They are suitable for straight or sweep cutting, and the general work of joiners, cabinet-makers, etc., and are intended for those shops where a larger machine is not convenient or necessary.

The Frame is a strong casting in one piece, and the Pulleys are truly turned and balanced, and covered with best indiarubber tyres vulcanized to the faces by a special process. The Top Pulley is made to rise and fall by a Hand-wheel and Screw, and is provided with a cantiing arrangement, by which the saw may run on any part of the face.

The improved Tension Motion is very sensitive and compensates for the contraction and expansion of the Saw while working.

Improved Adjustable Saw Guides are fitted both above and below the Table; the Top Guide is of a special antifrictional pattern; the Saw bears against the face (not the edge) of a Steel Disc, running on a ball bearing which provides a broad support for the Saw without generating heat; it is adjustable both horizontally and vertically.

The Table is truly planed and fitted with a cantiing motion so that work can be sawn at any required angle.

Prices, complete with Fast and Loose Pulleys, convenient Belt Motion, one 3 in. best French Band Saw, Screw Keys, and Tin of Lubricant.

Contractors to the Home, Indian, and Colonial Governments.
New Improved Band Sawing Machine.

These new 30 and 36 in. Band Sawing Machines have been designed to meet the demand for a high-class machine at a low price, and are suitable for general sawing and sweep cutting as required by Cabinet Makers, Pattern Makers, Joiners, Builders, and Coach Builders.

The Frame is a strong cored casting in one piece, with ample base, securing strength and preventing vibration when working.

The Saw Pulleys are truly bored, turned and balanced, are light and strong, reducing the breakage of saws to a minimum, and are covered with best Indiana rubber tyres vulcanized to the rim by a special process. The Top Pulley is made to rise and fall by means of a Hand-wheel and screw, and is fitted with a canting arrangement so that the saw can be made to run on any part of the face of the pulley. The Bottom Pulley is fitted to a steel shaft which works in long adjustable bearings, secured to the main frame.

The improved Tension Motion is obtained by means of a spiral spring which compensates for expansion and contraction of saw when working.

Improved Adjustable Saw Guides are fitted both above and below the table; the top guide is a special anti-frictional pattern; the Saw bears against the face (not edge) of a steel disc running on a ball bearing which provides a broad support for the Saw without generating heat; it is adjustable both horizontally and vertically.

The Table is fitted with canting motion, so that work can be cut to any required bevel. An Extension Table is fixed behind the Canting Table; this covers the bottom Saw Pulley and prevents pieces dropping on to it.

A Brush is fixed to keep the bottom Saw Pulley clear of resin, dirt, etc.

Prices, including Fast and Loose Pulleys, Belt Motion, one 3/4 in. Best French Band Saw, Spanner, and one tin of Lubricant.

“Improved” Hand Power Band Sawing Machine.

No. 2024w.

Weight, 5 cwt. 3 qrs. 0 lb. With Pulleys, 1 qr. extra.

This is a strongly built machine, having its frame cast in one piece, and is thoroughly well fitted in all its working parts. It is specially suitable for Joiners, Cabinet Makers, Coach Builders, etc., etc.

The canting table is 18 in. square and admits 42 in. diameter and 11 in. deep, thus allowing 11 in. lock-rails for doors to be tenoned. The pulleys are covered with indiarubber, so as to preserve the set of the saw. The machine has hardened steel runner guides both above and below table; has also fence for tenoning (not shown on drawing).

It is fitted with an improved tension arrangement, which entirely prevents breakage of saws.

Tool, Machine, and Hardware Merchants and Manufacturers.
Improved Combined Band and Circular Sawing Machine.

No. 2025w.

This is specially adapted as a labour-saving machine where steam power is not available.

The Circular Saw will cut 5 in. deep, and the Band Saw 6 in. deep. The Table is 4 ft. by 2 ft., and has a rising and falling Spindle (working in gun-metal bearings) for Rebating, Grooving, and Tenoning, and is fitted with a Self-acting Drag motion for feeding the timber, and a Parallel Canting Fence.

This Machine has variable speeds for hand-power—viz. one speed for light work, being quick, and the other for heavy work, being slow.

The Band Saw Table is fitted so that it will cant or swivel to any angle for the purpose of bevel or straight cutting of timber; it is also fitted with Angular Fence.

The Band Saw apparatus is fitted with patent Compensation Spring, which allows a free expansion and contraction of the Band Saw while at work. It is remarkably simple and effective, and prevents the breakage of Saws; it is also fitted with Brass Saw Guide and Steel Bowl, and is adjustable for wide or narrow Band Saws.

**For Hand Power.**

**Carriage Forward**

If packed and delivered f.o.b. London, 7½ per cent extra on list.

Liverpool, Birkenhead, or Hull, 5 per cent. extra on list price.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
New Improved Centre Slide-Rack Mortising Machine.

No. 2026w.

This Machine will take in work on Movable Table 16 x 8 in. Length of stroke 6 in., approx. weight 4 cwt.

Carriage Forward.

A low-priced machine of improved construction, accurate in all its working parts and thoroughly efficient.

The Frame is in one casting and gives to the machine the strength and accuracy necessary for good mortising.

The Wrought Iron Lever which brings the Chisel into operation is so placed that the workman using it may stand in an easy and convenient position.

A noticeable feature of this Machine is the improved Reversing Motion for the Chisel Spindle. It is made of steel and is not liable to get out of order or break.

The position of Chisel Box on back slide is easily adjusted for varying depths of work, by means of a couple of bolts and nuts.

Price of Machine including ¼, ⅛, ⅜, ½, ¾, and 1 in. Best Cast Steel Plain Chisels, 1 Core Driver, 1 Spanner, and 1 Set Square

Extra for Boring Apparatus, complete with ⅛, ¼, ½ in. Round Nosed Augers, and ¼ and ½ in. Cast Steel Drills

" " Tenoning Tool, which will cut tenons from ⅛ to 1 in.

" if fitted with Self-coring Chisels, in lieu of ordinary plain Chisels and Core Driver

" " " Venetian Blind Punch and Die (1 x ⅜ in.)

A large and varied Stock of Engineers’ Tools and Motor Accessories.
The "Centre Motion" Improved Patent Combined Mortising, Boring, and Tenoning Machine.

No. 2027W.

**No. 0** is adapted for fixing to bench only (no feet).
- Depth of Mortise 6 in.
- Length of Stroke 3 in.
- Takes in work 5 in. x 3 in.
- Approx. Weight of Machine 1½ cwt.

**No. 1** (as illustrated) will Mortise 11 in.
- Length of Stroke 6 in.
- Takes in work 12 in. x 5½ in.
- Approx. Weight of Machine 3½ cwt.

**No. 2**—stand and feet in one solid casting.
- Length of Stroke 6½ in.
- Takes in work 12 in. x 7½ in.
- Approx. Weight of Machine 4 cwt.

In this Machine the motion from the lever is communicated to the chisel through the centre of the slide, thereby giving a direct action over the chisel, and by this simple and effective arrangement additional power is obtained.

In fixing the chisel in spindle, set the face of chisel square with the fence of the tray, and let the figures on the chisel be towards the handle that turns the chisel; and, in mortising, the face of the chisel must meet the cut.

The chisels are easily loosened in the spindle, by being partly turned with the screw key sent with the Machine. If the chisels are strained in working, and do not reverse true, they are easily made to turn true by being struck with a piece of lead, or a smart blow with a hammer.

Price—No. 0, including ¼, ½, and 3 in. Best Cast Steel Chisels, 1 Core Driver, 1 Set Square, and 1 Spanner £6 10:0

" No. 1 " ¼", ¾", ½", ½", and ¾ in. " " " " £8 0:0

" No. 2 " " " " " " " " £9 10:0

Extra for Boring Apparatus, complete with ¼, ½, ¾ in. Round Nosed Augers, and ¾ and 1¾ in. Cast Steel Drills 1:5:0

" Tenoning Tool, which will cut tenons from ½ to 1 in. " " " " £2 0:0

" if fitted with Self-coring Chisels, in lieu of ordinary Chisels and Core Driver " " " " £0 17:6

" for Venetian Blind Punch and Die (1 in. x ¾ in.) " " " " £0 15:0

*Carriage Forward.*

Contractors to the Home, Indian, and Colonial Governments.
New Improved Roller Centre-Action Mortising Machine.

Recently redesigned and embodying many new improvements, this pattern is now one of the best Mortisers on the market.

Carriage Forward:

The cutting edge of the Chisel is in the same vertical plane as the centre of the Working Lever, and the Roller Centre Action will be found of great advantage in working either hard or soft woods.

The Frame is in one casting, and thus has the strength and solidity desirable and necessary for good and accurate mortising.

A noticeable feature is the Improved Reversing Motion, which is self-contained and not liable to break or get out of order. The Nut at the side slot can be very easily and expeditiously slackened back so that the fulcrum pin can be raised or lowered to suit the various depths of work required.

At the side of Tool Box is fitted a Bracket with a vertical pin to which the Boring Apparatus is quickly attached, thereby allowing the auger and chisel when in position for working to be in the same horizontal plane. The Boring Apparatus can also be attached to chisel spindle in the usual manner as in our other makes of Mortising Machines.

Price of Machine, including $\frac{1}{4}$, $\frac{1}{2}$, $\frac{1}{2}$, $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{4}$, and $\frac{1}{4}$ in. Best Cast Steel Plain Chisels, 1 Core Driver, 1 Spanner, and 1 Set Square.

$\underline{\text{L.} \ 8:5:0}$

Extra for Boring Apparatus, with bracket on side of tool box, complete with $\frac{1}{4}$, $\frac{1}{4}$ in. Round Nosed Augers, $\frac{1}{4}$, and $\frac{1}{4}$ in. Cast Steel Drills, and small Spanner (deduct $\frac{1}{4}$ if ordered without side bracket attachment).

$\underline{\text{L.} \ 1:10:0}$

Extra for Tenoning Tool, which will cut tenons from $\frac{1}{4}$ to 1 in.

$\underline{\text{L.} \ 2:0:0}$

if fitted with Self-coring Chisels, in lieu of ordinary plain Chisels and Core Driver

$\underline{\text{L.} \ 1:0:0}$

Venetian Blind Punch and Die ($1 \times \frac{1}{4}$ in.)

$\underline{\text{L.} \ 0:15:0}$

IMPORTANT TO THOSE ORDERING THROUGH SHIPPERS.—In order to ensure getting complete satisfaction, we advise our friends to be careful in giving definite instruction that the goods shall be procured direct from our house. By this means you may be sure of receiving the pattern and quality specified in our Catalogue.—Rd. MELHUISH, Ltd.

Bronze Medal, 1884.—Gold Medal, 1890.
Patent Centre Motion Mortising, Boring, and Tenoning Machine.

No. 2029W.

This is one of the strongest Hand Mortisers on the market, and is used by large builders, contractors, railway companies, collieries, etc., etc.

The Frame is strong and heavy, and cast in one piece, the working is Centre Motion, and the Improved Boring Apparatus can be fitted with pulleys for power when required.

PRICE.

Including 6, 7½, 8, 9, 1, 1½, and 1¾ in. Best Cast Steel Solid Chisels, 3 Core Drifters, and 2 Screw Keys, and ¾, 1, 1½, and 2 in. Augers for Boring, and ¾ and 1 in. Cast Steel Drills .... 20 : 10 : 0

Instead of ordinary Chisels, but with Self-coring Chisels, same sizes as above, also Augers and Drills as above (no Core Drifters) .... 22 : 10 : 0

Boring Apparatus fitted, with Pulleys for Power .... extra 1 : 10 : 0

Tenoning Tool .... 2 : 0 : 0

Weight of Machine, complete with Boring Apparatus,
7 cwt., 2 qrs.

Will take in wood 12 in. by 12 in. Will mortise 12 in. deep.

Free on Rail at Works. 7½ per cent. extra F.O.B. Liverpool; 5 per cent. extra F.O.B. London.

Tool, Machine, and Hardware Merchants and Manufacturers.
Patent Chain and Hollow Chisel Mortising Machine.

No. 2030w.

Worked with Patent Drive (no Gear Wheels or heavy Weights), whereby the highest efficiency without noise is obtained. No countershafting being required, a saving of up to 10 ft. of floor space is effected.

This Machine is well and strongly made, and its Frame is of heavy section and cast in one piece. It is small, compact, and capable of doing the work of, and in less time than, the largest Automatic Machines. It is the easiest to work, the quickest to handle, and can be operated by an intelligent lad.

The Slide carrying the Chain has a full stroke of 12 in., and is brought down to the wood by the Hand Lever working on a patent Centre Motion principle. This enables the operator to feel his work and feed according to the nature of the wood.

All bearings are extra long and self-lubricating; they require but little attention and use the same oil over and over again.

Hollow Chisel Arrangement.

Owing to the limitations of the Standard Chain Cutters, i.e. 1½ in. in length, the Hollow Chisel is employed to make small mortises for sashes, cabinet work, etc. These are cut by means of a revolving auger running inside a square hollow chisel while the worm motion of the auger brings the chippings rapidly away through the side and top of chisel. This arrangement is quite independent of the chain cutters, and can be used for ordinary boring by substituting a boring bit for the hollow chisel and auger.

Takes in Wood 12 in. deep by 9 in. wide.

Will Mortise from ¾ in. to 1 in. wide and up to 6 in. deep.

Price of Complete Machine for Chain Cutter and Hollow Chisel Mortising, and including one ½ in.
Mortise Chain, Guide Bar and Sprocket, and one ½ in. Square Hollow Chisel and Auger, Suction
Fan, Improved Chain Sharpening Machine attached to Frame, and Set of Sprocket Handles and
Spanners. Weight 11 cwt. As above, but with Chain Sharpening Machine supplied loose to fix on a Bench

£39:5:0

£37:10:0

No. 2051w. The Illustration shows the DRIVING BELT used in the above Machine.

It runs in V-shaped pulleys, and consists of a combination of Leather and Steel Links. The leather only comes in contact with the pulley, and the internal steel links supply the strength. The Belt is of enormous strength, yet flexible, and is practically unbreakable and indestructible.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
MELHUISSH'S **Carlton Silver** Spoons and Forks, etc.

These Forks and Spoons are made in only one quality, namely, the best. They have a beautiful White Colour throughout, equal in appearance to Sterling Silver. Their wear is practically everlasting. Fiddle or Old English, same prices.

Automatic Stropping Machine for Razor.

By means of this Machine the most inexperienced may produce a perfectly keen edge on his Razor.

DIRECTIONS.—Slide back of Razor Blade into Spring Clamp in centre of Frame, hook Machine to any convenient object, say the “Third Hand,” as described below, then pull Strop to and fro half a dozen times or more. Care must be taken not to let Razor Handle come in contact with anything while stropping.

No. 2154W.

Price ... 12/6 each.
Also made for Safety Razor Blades ... 7/6.

“Third Hand” Drawer Hook Vice.
No. 2155W.

This clever device (weighing but 1½ oz.) can instantly and firmly be fixed in any drawer without injury to the furniture. It is then ready for holding Razor Strop, Ladies’ Hair Switches, the points of Hair Pins for curls, Fish-Hooks for repairing purposes, and forms a Hand-Vice for making flies, Thread for threading beads, Wet Films and Photos, the ends of netting in the making, wire for working, plating, securing a small dog to dressing table, hanging up clothes, cleaning chains and jewellery, cleaning or whitening belts, etc. As a Hand-Vice it forms a valuable tool for Cyclists, Motorists, Fishermen, and others.

Prices (Plated and in handsome Presentation Cases):
Hook only ... 1/-
Hook and Vice, as illustration ... 2/-

Price ... 1/9 each.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
Hair and Beard Clippers.

Owing to the highly finished make of each part of this clipper, and to the groove in the lower set of teeth, it is possible to obtain the closest cut (1/16 of an inch or less) one can imagine. In fact, any one not possessing a very strong beard can use it entirely in place of a razor.

Its simple construction readily permits of its being taken to pieces for the purpose of cleaning the teeth, and the removal of these latter is quite easy, should it be necessary to change the spring.

Price complete in Box with 2 extra Springs ... 4/9
  " extra Bottom Plate ... ... ... ... ... ... ... 1/9
  " Top ... ... ... ... ... ... ... ... ... ... ... ... ... 1/6

A most reliable Clipper of new design, each complete with one extra Spring.

No. 2169w. To cut 1/8 in. Price ... 3/6
  " 2170w. With 1 Sliding Comb, cutting 1/16 and 1/8 in. ... 4/3
  " 2171w. With 2 Sliding Combs, cutting 1/16, 1/8, and 1/4 in. ... 4/9
Extra Bottom Plate ... ... ... ... ... ... ... 1/9
  " Top ... ... ... ... ... ... ... ... ... ... ... ... ... 1/6

This Clipper is beautifully made. The ease of the cut and the smooth working of the "push-spring" make it quite a general favourite.

No. 2172w. To cut 1/8 in. Price ... 6/-
  " 2173w. With 1 Sliding Comb, cutting 1/16 and 1/8 in. Price 7/-
  " 2174w. With 2 Sliding Combs, cutting 1/16, 1/8, and 1/4 in. Price 8/-
Extra Bottom Plate, to cut 1/8 in. ... ... ... ... 1/9
  " " ... ... ... ... ... ... ... ... ... 2/9
  " " Top Plate ... ... ... ... ... ... ... ... ... ... ... 3/-

We warrant all goods bearing our name to be perfect, so far as material and workmanship are concerned. If a tool proves too soft, or breaks in consequence of a flaw in the steel, and is returned within a reasonable time from the date of purchase, a new tool will be given in exchange. If it is broken where the steel is sound it cannot be exchanged.—R. MELHUISH, LTD.

A large and varied Stock of Engineers' Tools and Motor Accessories.

The Improved Gem Safety Razor.

No. 2198w.
Handy, Reliable, Extremely Compact, and British Made by British Labour.

Extra Blades,
1/6 each.
In tin case with one Blade, 3/- each.

The adjustment for the Blade being rigid, it is impossible for the Razor to get out of order. The handle is divided into two parts—one screws into the frame, the other part will either fit on to that, or slot into the Blade holder, which is used for stropping and honing.

No. 2199w.

For giving a perfectly keen and easy shaving edge to Safety Razor Blades. A special feature of this design is the clever arrangement whereby that part of the strop against which the blade is presented assumes a convex surface, consequently the original curvature of the edges of the blades is maintained. Impossible to cut strop during manipulation if directions are carried out.

Price,
Silver-Plated, and with finest Pigskin Strop,
7/6

Clemak Safety Razor

The Clemak Safety Razor, with its Mechanical Lever Action and freedom from screws, bars, etc., marks a new era in self shaving.

To bring the Blade into correct position for shaving or to free it for cleaning, it is only necessary to press the knob, and the Blade is automatically fixed or released as desired.

Clemak Blades are made from the finest quality steel, and if properly stropped and carefully used will last for years.

Clemak Blades, price 2/6 per packet.

No. 2209w.
An original and effective Stropper. Not only is the Blade brought down upon the Strop, but the Strop is forced up to meet the edge of the Blade, making the Machine doubly effective.
Price 3/6, including superior Hide Strop.

Bronze Medal, 1884.—Gold Medal, 1890.
Vertical Letter Filing Cabinet.

In Fumed Oak.

No. 2281w.

The Cabinet contains four drawers, each of which has a filing capacity of about 5,000 letters; it is complete in itself but so constructed that should increasing correspondence make extension necessary other similar sections can be added whenever required.

Size, each drawer, 12½ in. wide, 10½ in. high, 22½ in. back to front. Exterior measurements: 15 in. wide; 54 in. high; 27½ in. back to front; top, back and sides panelled.

Price, Cabinet only... ... ... ... £6:0:0
Cabinet complete with 60 folders and 20 guide cards in each drawer ... £6:10:6

Fumed Oak Roll Top Typewriter Desk.

No. 2282w.

Measurements closed: 23 in. wide; 24½ in. deep.

Measurements fully extended: 34 in. wide, including side extension; 36 in. deep.

Height, 46½ in.

The bed pulls out to afford facility for typing, and when pushed back the whole cabinet can be locked; drawers automatically locked and unlocked by roll-top action.

The side extension slide is attached to the underpart of machine bed extension, and can be drawn out for use on either the right or left side to hold correspondent's note book, etc.

Fumed Oak... ... ... ... £4:6:3

Typewriting Desk.

3 ft. wide; 2 ft. 8½ in. high; 2 ft. 7½ in. deep; width of Typewriter bed, 1 ft. 8½ in.

The Typewriter need not be detached when not in use, as the bed on which it stands shuts into a dust-proof case, the Typewriter is entirely hidden from view and securely locked; the desk can then be used as an ordinary flat top desk. Drawers are automatically locked and unlocked by the closing of the top drawer.

Fumed Oak... ... ... ... ... ... ... ... £8:17:6

Quotations given for Card Index System Cabinets on application.

Invented after practical experimenting and exhaustive tests. Efficiency is proved by the remarkable demand that these have commanded during the short time they have been on the market. Adopted by all who wish to prevent accidents.

SAFETY.—Absolutely rigid when in use, the spacious platform allows the user to stand as comfortable as on the floor itself, and enables free use of both hands, the extended side and back supports act as guards.

PORTABILITY.—No heavier than ordinary steps, and they fold much more compactly, the back supports closing over the front, and the platform folds and opens automatically. This applies to both Single-back and Twin-back Patterns.

Smithfield Butchers' Cleavers.

No. 235tw.
Bright Cast Steel, with Scale Tang.
To 3¼ lb., 1/4 per lb.; over 3¼ lb., 1/2 per lb.

Bronze Medal, 1884. - Gold Medal, 1890.
Food Choppers, etc.

No. 2352w.
Well adapted for ordinary household purposes. Tinned throughout with Pure Tin and fitted with Patent Notched Propeller.

Chops 1 lb. per minute. With 3-Discs .... 3/3 each.

" 2 lb. " 4 " 3/11 "
" 2 lb. " 5 " 4/6 "

No. 2353w. Improved pattern. Tinned throughout with PURE TIN, and fitted with Patent Notched Propeller. The four cutters illustrated above are sent out with each of these machines.

Chops 1 lb. per minute. With 4 Discs .... 3/8 each.

" 2 lb. " 4 " 4/6 "
" 2½ lb. " 4 " 5/- "

No. 2354w.
This design is extremely simple; it has in fact practically but two parts—the Case and the Propeller. The Case can be opened wide, and its interior, as well as the Propeller, Cutter, and Disc, may easily be rinsed and wiped.

All parts, except the Cutters, which are nickel-plated, are heavily tinned.

NOTE.—In these machines the knives Cut the food. Working against the Steel Disc they sharpen themselves, and so constantly preserve their edges.

Closed, ready for use. Carriage or Postage Extra.

No. A. Cuts 2 lb. of meat per minute ...
B. " 3 lb. " ....
C. " 5 lb. " ....

5/- each. 6/- " 9/6 "

STANDARD QUALITY TOOLS, MACHINERY AND APPLIANCES.

Our Tools, etc., have a good reputation by reason of their quality, and our Prices are Right because they are in line with the Quality. Inferior Goods may be bought for less money—and for more money.

R. MELHUISSH, Ltd., London.

Tool, Machine, and Hardware Merchants and Manufacturers.

Please Note that the gearing of this machine is well boxed in and is dirt and accident proof, but for the purpose of showing the mechanism we have illustrated it with the cover removed.

To be driven by Electric Motor as shown or other existing power.

The above machine has been introduced to meet the requirements of Hotels, Clubs, Institutions, Steamships, etc., where large quantities of knives are in daily use. It will clean seven to eight hundred knives per hour with efficiency and at a trifling cost for power. The framework and gearing has been specially designed and constructed, and to the following points we would draw attention. The machine is fitted with Patent Self-Regulating Spring-Pressure Discs, giving an even pressure on the knives when in action; also the solid Rubber Buffer Stays give protection to the handles of the knives.

The main shaft is fitted with fast and loose pulleys, and the principal bearings on main shaft are gun-metal. All bearings are oil retaining, and the steel worm gear running in special dust-proof oil-bath. An efficient thrust gear with ball bearings is provided for throwing in and out of gear, and each detail has been most carefully thought out. The machine is a triumph of simplicity, strength, and efficiency, there is nothing to get out of order, and any intelligent youth can use it. Strongly recommended as being far ahead of all other knife-cleaning machines. Arrangements may be made to see it in daily use by giving us short notice.

Size A—Price without motor, to clean 6 knives and carver, £14:14:0

Size B—Price without motor, to clean 9 knives and carver, £16:16:0

Carriage Forward.

These machines are of the highest class workmanship and are provided with a simple and effective invention whereby the desired and correct adjustment between the cleaning discs is automatically maintained. They are also furnished with Patent Solid Rubber Buffer Stays for giving protection to the handles of the knives.

THE NEW PEWTER RELIEF MODELLING.

Those with an inclination for Artistic Handicrafts should find the new PEWTER RELIEF MODELLING exceedingly interesting, as with little practice effective results can be obtained. The illustration of a Hand-Mirror given here will convey an idea of this new Pewter Modelling when finished.

GENERAL INSTRUCTIONS.

PEWTER RELIEF MODELLING is made very easy for the amateur, as all the woodware articles for ornamentation are supplied with a sheet of metal ready designed with an artistic and suitable pattern to commence upon. The metal supplied is also, with regard to toughness and pliability, just right for the purpose.

When commencing, place the Pewter Metal on a piece of linoleum and trace the design with a Scriber or Outlining Tool, using not too heavy pressure. Then place the Metal face downwards on a glass slab, and draw a second line on the inside of the design.

To bring the design into relief place the metal face downwards on Linoleum or Felt, according to the relief required, and carefully press down the metal at the parts which are to stand sharply in relief. In the case of veins of leaves, etc., a single line only is necessary, and this done from the back with a Modelling Iron will give sufficient relief.

During the process of bringing the design into relief as just mentioned, the broad finishing tool should be used freely on the background to keep the work flat, and also when the relief work is finished the background must be smoothed out. This should always be done on the face of the metal with the glass slab beneath.

The next step is to colour the Pewter with “Patina.” The metal must be well cleaned with benzoline and special preparation applied to remove grease. Patina colour is then applied with a brush all over the design and left for a few minutes. The superfluous colouring can be removed by gently dabbing, and the metal should be left until quite dry.

The work should then be buffed up with Burnishing Material, using plenty of the powder. The article is then again well cleaned with benzoline and a final polish with a chamois leather will complete the process.

Where Coloured Stones are introduced into the design, the holes should now be punched through and the design cut out, care being taken to leave sufficient edge all round for nailing on the wood. Before nailing down, the hollow places on the back should be filled with the Ivory Filling Powder supplied for the purpose, which must be used in a very soft paste.

NOTE.—This section of our Catalogue contains the leading lines in Woodworkers’ Tools, Machinery and Accessories. Other sections, embracing a great variety of Engineers’ Tools, Appliances, Machines, Electrical Goods, Motor Tools, Horticultural and Estate Agents’ Requirements, Building, and Furnishing Ironmongery, etc., etc., will be posted on application.

We are always pleased to receive enquiries from, and submit special quotations to, our friends abroad.—RICHARD MELHUISH, LTD., London, E.C.

- Special Shelf No. 71, for use with "Primus" Oil Stove ... 0 1 9d.

Total ... £2 11 7d.
The Celebrated Carbotron Stoves and Fuel.
The very Stove for the Motor House. The only Pattern which meets with the Approval of Fire Insurances.

There is no danger of sparks flying out and causing disastrous fires, such as are constantly occurring.

They can be moved about whilst alight and placed upon wood floors or carpets without any risk of damage or fire.

Their heat can easily be regulated, and they can be transferred from one part of the room to another at any moment without leaving any dust or dirt where they have stood, the feet of the Stoves being quite cool.

All the heat from the Stoves goes into the rooms and not the greater part up the chimney, as in open coal fires; this is an important fact.

They are also specially suitable and are largely used for heating Motor Houses, Garages, etc., for as the fire is not exposed, and owing to the entire absence of flame, there is no danger, with ordinary care, of petrol catching fire and exploding. This cannot be claimed for any other kind of Stove, and we therefore confidently recommend them to all owners of Motor Cars, for preventing damage by frost.

When once lighted, the Stoves require no further attention from six to twelve hours, according to the regulation of the ventilators, as the Carbotron burns slowly and evenly.

They can be placed in Entrance Halls, Corridors, Offices, Shops, Warehouses, Hot-houses, Coach-houses, etc., in fact in all kinds of rooms even where there is no chimney or flue, and are specially adapted for Motor Houses, to prevent freezing.

When placed in Lavatories, etc., in winter they will prevent water pipes and fittings from freezing and bursting, and thus save great expense and inconvenience, as is so often experienced in our changeable climate.

These Stoves and their fuel cause no dust, leave no cinders, and do not want cleaning out daily like ordinary fire-places, thereby greatly economising time and material.

The pan containing water at the top of the Stove is for the purpose of keeping the air moist, and this is invaluable for throat and chest affections, when, with the addition of a little Eucalyptus Oil, etc., the action of the steam will greatly relieve the sufferers.

SOLD IN THOUSANDS.

Price ...                                          £1.0.0 each.

With Plated Top and Water Basin, 7/- extra.

Carbotron is a chemical compound which in burning gives off neither smoke, smell, nor fumes, develops a great amount of heat, and burns with very little draught.

The Fuel can also be had in One Cwt. boxes with the Carbotron cylinders packed side by side, by hand, at the works, thus avoiding broken pieces, and being much cheaper to handle and store.

Quantities of at least 20 bags or boxes at a time, equal to one ton, are delivered carriage paid to any part of the United Kingdom.

Price 15/- per Bag containing One Cwt., packing free.

Price 15/9 in Box, not returnable.

Where the approximate heating power of the Stoves is given it is understood to be in rooms having doors, windows, and flues only.

Packaging for Stoves charged extra, but allowed if returned carriage paid and in good condition within fourteen days.

In Shops with outer doors opening continually, and for Conservatories and other Glass Houses the heating power will be less in proportion.

On account of their great convenience and portability, these Stoves are extremely useful for many purposes; amongst them may be mentioned the heating of Entrance Halls, Corridors, Shops, Rooms, Motor Houses, Greenhouses, etc., as, if necessary, they can be carried about from place to place whilst burning.

Orders of 20/- and upwards Carriage Paid (with few exceptions).
Sand-Papering Machines.

No. 2454W.

With this machine the straight faces of articles which are difficult to plane or smooth up by hand can be rapidly finished off with a smooth surface.

Owing to its high speed everything is of the best quality; the discs are of high-class iron truly turned and balanced, the gun-metal bearings are of good length, the standard is of massive design with a good base area, which ensures steady running, and the method of fastening the sand paper on is most simple; when worn, the paper can be replaced in about a minute.

The loose pulley is gun-metal bushed, and the belt striking gear is most conveniently placed.

Machine as illustrated, with 41 in. discs, fast and loose pulleys, and belt shifter complete, £18:10:0.

Other sizes will be quoted for on application.

Glass Paper and Emery Cloth.

No. 2455W. "Atlas" Improved Cabinet Glass Paper, good strong quality, tough and flexible
2456W. Oakey's Cabinet Glass Paper
2457W. Oakey's Emery Cloth
2458W. Blue Twilled "Atlas" Emery Cloth, extra strong "Flexible," stamped name and trade mark in black; specially made for Engineers, Cycle and Sewing Machine Makers; most suitable for use in strips and all those purposes where great strength, durability, and perfect flexibility are required
2459W. Carborundum Cloth, sheets 11 x 9 in., Nos. 2, 1½, 1
2460W. Single Sheet, ½ FFF, FF, F

A large and varied Stock of Engineers' Tools and Motor Accessories.
Improved Mitre Box.  No. 2461W.

Longitudinal Gauge with Adjustable Jaws for cutting cornices or mouldings of the same length.

For picture-frame makers, joiners, cabinet-makers, etc., etc.

For accuracy of construction, exactness of cut, easy handling and great durability, they are far superior to most patterns now on the market.

The new Bow Saw, with Stay consisting of a Steel Tube, is handier than an ordinary back saw and lighter than a wooden frame. It also degree than is possible in other saws. The blade is steadied by a Adjustable Steel Guides. The bed of the Mitre Box is entirely of Iron, and the Table has a wooden segment fitted in the cutting circle.

To take mouldings up to 5½ in. high x 4 in. wide. Approximate weight, 26 lb. Price complete, 43/6 1/9 each. Saw Guide

Mitre Box.

No. 2462W.

Set complete with 12 in. Warranted Back Saw.

This is a good, cheap, and useful combination for picture and other mouldings, amateurs' use, etc., etc. The Mitre Box is made of hard wood with mitre and straight cuts. It is 12 in. long, 2½ in. wide, and 2½ in. high inside.

Price ... 5/6 per set.
Packed in Paper Box. Weight 3½ lb.

Improved Marking Gauge. No. 2463W.

Marked in Centimetres and Millimetres. No knocking of the Gauge is necessary to adjust it. By simply releasing the countersunk brass set-screw, which works on a small brass plate, the Gauge can be adjusted instantly. The head is of lignum vitae and is extra large. The points are of fine steel and can be adjusted when worn.

Price ... 1/6 each.

The "Atkins" Silver Steel Saws. WITH PERFECTION HANDLE.

No. 2464W.

The Blades of these celebrated Saws are manufactured from a special fine tool steel capable of high temper and taking a keen cutting edge without crumbling. The Teeth hold their set longer and do more work without filing than other saws. The Blades are ground so carefully from teeth to back and from point to handle that they would not bind even if worked without set. Special attention is called to the forms of the Blade and the Handle, whereby the Saw conforms to and balances well in the grasp of the hand, and enables full cutting force to be given the entire length of the Blade.

Size 24 in. ... 5/9. 26 in. ... 6/- 28 in. ... 6/9 each.

Contractors to the Home Indian, and Colonial Governments.
Combination Butt Gauge. No. 2465w.
Specially designed for Door Hanging and Mortice Work. The Double Edge Spurs are carefully hardened, the one on the back end of the double-end bar is adjustable for the regulation of clearance. This Gauge is made entirely of Steel, fall polished and nickel-plated.
Price ... ... 3/3 each.

Adjustable Handle Drawing Knives (Patented).
No. 2466w.
Folds into small space, goes into hand tool case or shoulder chest; folded handles protect cutting edge; no slots to hurt the hands. Handles adjust to suit workman. Blades properly tempered, ground, and honed. Tangs extend through handles.

No. 564W

Vanadium Alloy Steel, improved temper, mirror polish, carved Hardwood handles, polished all over, raised brass screws. These Saws are the best that can possibly be made, regardless of price. The blade is made from a secret alloy of Vanadium Steel, of great toughness, and will work longer than any other saw without sharpening, being at the same time more difficult to buckle in use.

We endeavour to keep in stock the following points in the best quality Saws.
