"BED ROCK" Planes.
A NEW STYLE OF IRON BENCH PLANE.

The perfected design of this Plane allows a combination of the utmost solidity, with more adjustments than any Bench Plane ever produced.

Both surfaces of the Frog are machined, and the bottom surface is in contact with the machined surface of the Plane body, thus giving the Cutting Iron as solid a bed as though resting on the Plane body itself.

A Tongue is made on the bottom side of the Frog, and a corresponding groove is formed in the Plane body, overcoming any possibility of shifting or "wobbling" of the Frog.

ROSE TOOLS, INC.
"BED ROCK" Planes.

When it is desired to open or close the mouth, it can be easily done by turning the screw shown at the back of the Frog. The Tongue and groove mentioned insures that the Frog moves at a true right angle with the mouth.

These new features will commend themselves to all who use Planes.

Ask your dealer to show you one of these tools, which you will know by the Cap.

The numbers in above list refer to the cut on opposite page.

In ordering parts for any Plane, give the number and name as given in the list and also the number of the Plane for which the parts are required.

The collection of parts marked A consists of the No. 6 Frog, No. 7 "V" Adjustment, No. 8 Brass Adjusting Nut and No. 9 Lateral Adjustment. These parts we term "Frog Complete" and if a "Frog Complete" is ordered, the parts are always put together before shipment from our factory.

Many of our Special Planes, i.e., Nos. 111 Circular and No. 32 Scraper, etc., have some of the same parts as the Regular Line of Bailey Planes, and this list therefore, in many cases, will apply for ordering parts for Special Planes.
